

Prodikt, the sustainability platform, signs agreement with Sveafastigheter

In order to strongly reduce carbon dioxide emissions from the construction and property industry, there is a great need to easily calculate the climate impact from materials used in construction. Sveafastigheter has chosen to expand its collaboration with Prodikt and will now start annual subscriptions for all its projects. In this way, Sveafastigheter will work actively with its entire project portfolio and thus gain increased control and become even more concrete with its sustainability work.

Prodikt is a unique and open digital sustainability platform for building materials and projects that makes it possible to easily go from, e.g. a BIM model to an analysis of both system and product choices, to a completed climate declaration. Through the use of data-based sustainability information down to the product level, Prodikt, together with Sveafastigheter, will actively contribute to making the buildings of the future more climate-smart, circular and healthy. In March 2022, BIMObject AB invested in Prodikt, as part of the company's strategy to increase revenues from new digital services to the construction industry.

"For us, it is an obvious priority to work concretely to reduce our climate footprint. Through the collaboration with Prodikt, we get an overview of our carbon dioxide emissions, so it becomes clearer what we have to do to reduce it. Now we will be able to have control from pre-study to the user phase, integrate with our own product and system library and continuously be trained in this work", says Görel Hällqvist, Business Area Manager Projects, Sveafastigheter.

"We're very excited to work long-term with such an ambitious property developer as Sveafastigheter. The expanded collaboration is completely in line with our strategy to assist builders and property developers in making fast, educated and quality-assured sustainability calculations in their projects. It is only then that we will be able to enable optimization of various choices and engage all the actors in the construction process", says Rasmus Ekberg, CEO and co-founder, Prodikt.

"The agreement with Sveafastigheter confirms the demand for better digital tools for sustainable construction that led us to invest in Prodikt. We see great opportunities for Prodikt to grow both in Sweden and internationally", says Carl Silbersky, CEO of BIMObject AB.

About BIMobject

We can't go on building like we do today. BIMobject is on a mission is to digitalise construction for a more sustainable future. We're a global marketplace for the construction industry, that provides architects and engineers with the information and inspiration they need to design buildings faster, smarter and greener.

With 2,000+ building product brands* and 100 of the world's top 100 architect firms among our users, we power digital building design worldwide. In 2021, the company had annual net sales of SEK 120 million.

BIMobject's shares are traded on Nasdaq First North under the ticker: BIM.
Certified Advisor: FNCA Sweden AB, info@fnca.se

** Defined as the number of unique brands (including subsidiaries with separate product ranges) with products available for download on bimobject.com.*
