## FPC partners with AdvanIDe to bring the AllKey Ultra biometric FIDO solution to markets globally

Gothenburg, Sweden & Walluf, Germany – May 12, 2026 – Fingerprint Cards AB (FPC) today announced a global partnership with AdvanIDe – Advanced ID Electronics, a specialized distributor of advanced semiconductor and security solutions, to promote and supply FPC’s AllKey Ultra biometric single chip solution worldwide. Under the agreement, AdvanIDe will act as a global channel partner, supporting demand creation and ensuring immediate product availability through stocked inventory.

AdvanIDe is an established distributor with deep technical expertise in secure silicon, embedded systems and identity solutions, supporting customers across industrial, enterprise, and security-critical markets. With a strong global footprint and close engagement with system integrators and solution providers, AdvanIDe is well positioned to accelerate adoption of FPC AllKey Ultra across a broad range of use cases, including secure access, authentication, and identity-driven applications.

The partnership is designed to expand the commercial reach of FPC AllKey Ultra by combining FPC’s leading biometric technology with AdvanIDe’s proven ability to drive design-in activity and customer engagement. AdvanIDe will actively support demand generation initiatives, working closely with customers to shorten time-to-market and lower barriers to adoption. AdvanIDe has FPC AllKey Ultra products available, ready to support immediate customer needs.

Launched in November 2025, FPC AllKey Ultra integrates fingerprint sensing, biometric processing and secure element functionality into a single chip solution, enabling high-security authentication with low power consumption and simplified system integration. The solution, with jNet JavaCard OS, is designed to address growing demand for hardware-based security in applications where trust, data protection and user convenience are essential.

This partnership advances FPC’s strategy to expand its presence beyond traditional biometric sensors and increase revenue opportunities from complete biometric system solutions, while improving accessibility and scalability through trusted global partners

**Adam Philpott, CEO of FPC, comments:**

“Partnering with AdvanIDe strengthens our global go-to-market strategy for AllKey Ultra. Their strong technical capability, customer proximity, and focus on secure and identity-centric solutions make them an excellent match for this product. With ready-to-ship availability, this partnership supports faster adoption and reinforces our ambition to scale AllKey Ultra across security-critical applications worldwide.”

**Holger Roessner, CEO of AdvanIDe, added:**

“FPC’s vision and commitment to security-critical applications align perfectly with our own strategic direction and key competencies. FPC’s integrated biometric system represents a significant step

---

forward in secure authentication, combining performance, security, and ease of integration in a single solution. This collaboration reflects our shared ambition to stay ahead of evolving security demands and to deliver scalable, future-ready solutions to customers worldwide. We look forward to driving sustainable growth together.”

**About FPC**

Fingerprint Cards AB (FPC) is a global biometrics and identity leader. We deliver intelligent edge-to-cloud solutions that make identity secure, seamless, and passwordless. Trusted by enterprises, fintechs, and OEMs, our platforms power hundreds of millions of devices and enable billions of authentications daily. Beyond consumer electronics and payments, we strengthen enterprise identity with help desk enablement, self-service recovery, and support for shared devices. With multi-modal biometrics, including fingerprint, iris, face, and more, we reduce friction, cut IT costs, and improve user experience. FPC is listed on Nasdaq Stockholm (FING B). **About AdvanIDe**

AdvanIDe – Advanced ID Electronics – is the global leader in semiconductor solutions for RFID transponders, chip cards, and secure access systems. Our components empower secure identification, eGovernment services, IoT applications, and more. With over 30 years of experience and history in this industry, AdvanIDe’s foundations were established and expanded based on expertise, know-how, innovation, and an unwavering commitment to quality. Not only by driving innovation but also by building long-term partnerships and anticipating advancing technologies, we are proud to make our meaningful contribution to building infrastructure for a safer, more connected world.
