

Dynamic Dosage awarded Best Innovation – AI Makes a Big Difference in winter maintenance industry

We are proud to announce that Dynamic Dosage has been awarded a prestigious title of "Best Global Innovation" by the Equipment Suppliers association in Denmark." This recognition highlights the groundbreaking advancements achieved by Dynamic Dosage, an Epoke product powered by Klimator data. Out of 21 nominated technological solutions, EPOKE was one of the winners.

Dynamic Dosage represents a transformative shift in winter road maintenance practices. By integrating Klimator's cutting-edge weather forecasting technology, the system provides a highly adaptive, responsive, and efficient approach to road safety and maintenance. This innovative solution not only improves safety and sustainability but also sets a new standard for how winter road maintenance should be managed in the future.

We extend our congratulations to Epoke for this remarkable achievement and express our sincere appreciation for the exceptional collaboration we have shared, which has been instrumental in bringing this innovative solution to life. This award inspires us to continue pushing the boundaries of what's possible and to lead the way in delivering innovative solutions that make a real difference.

Dynamic Dosage represents the powerful development currently taking place in the industry around increased digitalization and automation for winter road maintenance. The increased use of AI and Big Data generates more detailed and precise forecasts for WHEN and WHERE the road will become slippery, as well as what measures are most suitable. A higher degree of automation leads to reduced environmental impact, smarter use of all resources, and also contributes to an improved working environment for users who often work alone at night and must make decisions based on different scenarios.

About Klimator

Klimator AB is a publicly listed software company with over 30 years of research in applied road climatology. Klimator has two innovations – the data platform Road Condition Data (RCD), providing predictive high precision road weather information, and the sensor fusion solution AHEAD providing real-time detective road weather information. With these innovations, Klimator provides precise and reliable road weather information to the winter maintenance and the automotive industries creating safer roads and enabling scalable autonomous driving (AD) and intelligent driver support systems (ADAS). In 2020, Klimator acquired HedeDanmark's business operations within connected sensors to broaden and strengthen Klimator's product portfolio.
