RevolutionRace's new climate targets validated by the Science Based Targets initiative

RevolutionRace today announces new climate targets, validated by the Science Based Targets initiative (SBTi). The new targets means that RevolutionRace is committed to reduce absolute Scope 1 and Scope 2 greenhouse gas (GHG) emissions by 50% by 2030, using 2022 as the base year, and to reduce Scope 3 GHG emissions by 52% per sold unit by 2030, compared to the 2022 base year.

Our mission is to make nature accessible for everyone and as we continue our journey, the new climate targets demonstrates that our commitment to reduce GHG emissions is of high importance and at the core of our way of working, says Paul Fischbein, CEO of RevolutionRace.

About the Science Based Targets initiative (SBTi)

The Science Based Targets initiative (SBTi) is a corporate climate action organization that enables companies and financial institutions worldwide to play their part in combating the climate crisis.

SBTi develop standards, tools and guidance which allow companies to set greenhouse gas (GHG) emissions reductions targets in line with what is needed to keep global heating below catastrophic levels and reach net-zero by 2050 at latest.

The SBTi is incorporated as a charity, with a subsidiary which will host its target validation services. SBTi's partners are CDP, the United Nations Global Compact, the We Mean Business Coalition, the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF).
