

Wall to Wall Group and Trelleborg partner to develop next-generation relining materials

Wall to Wall Group has entered into a strategic partnership with Trelleborg Group, through its business unit Seals & Profiles, to develop the next generation of materials for pipe relining.

Relining is the fastest-growing method for renovating pipes. In the Nordic region, the total market for internal pipe renovation is estimated to be worth around SEK 5 billion and is expected to grow by more than 10% annually. Wall to Wall Group is the Nordic region's largest player in relining, while Trelleborg contributes world-leading expertise in material development and innovation.

The new relining materials will be used and sold by Wall to Wall Group under its own brand. They meet the highest standards of sustainability, quality, and performance. Through this partnership with Trelleborg Seals & Profiles, a unified material solution is created for Wall to Wall Group's operations, while also introducing a product that can be launched globally to meet the growing demand for advanced solutions in the industry.

"This partnership marks the culmination of a two-year process where we evaluated various opportunities to develop the materials of the future for relining – focusing on sustainability, safety, and high performance. With Trelleborg's material expertise and our operational know-how, we have found the perfect combination," says André Strömngren, CEO of Wall to Wall Group.

"We look forward to developing our collaboration with Trelleborg and see this as the beginning of a long-term and successful partnership," says Karl-Johan Tjärnvall, member of Wall to Wall Group's executive management team and original founder.

"The Scandinavian countries have for many years been the front runners of relining the pipes inside buildings and our ambition is to grow this technology worldwide. We are delighted to have signed a long-term supply agreement with our partner Wall to Wall to support the usage of this technology globally", says Christoffer Ljungbäck, Business Unit President, Trelleborg Seals & Profiles.

This information is an update to the press release published by Wall to Wall Group on February 13, 2025, where the collaboration was communicated without naming the Trelleborg Group.
