

OPTICEPT - NEW ORDER FOR FPS USA

OptiCept Technologies AB (publ) announces that its partner FPS Food Process Solutions (“FPS”) has secured a new order for one OPTICEPT® SP7 system from a small French fries producer in the United States. The order is estimated to be installed in July 2027.

This order marks another important step in the commercialization of OptiCept’s PEF technology within the rapidly growing global potato processing market. It also demonstrates that FPS continues to win business with OPTICEPT® as an integrated partnership.

By combining OPTICEPT® with FPS process solutions, customers can unlock clear, quantifiable value in production. The solution improves efficiency, delivers more uniform cuts, enhances product quality, reduces energy consumption and waste, and increases the share of saleable product, thereby supporting both improved profitability and sustainability performance for processors.

“This order is further confirms that our PEF technology is now gaining strong traction in industrial french fries production. The fact that a customer in North America has chosen OPTICEPT® SP7 confirms both the value of the technology and the clear need for solutions that improve profitability, quality and resource efficiency,” says Henrik Nettersand, CEO of OptiCept Technologies.

About Us

OptiCept Technologies AB (publ) provides the food and plant industry with technological solutions that contribute to a more sustainable world and enable climate-smart economic growth. OptiCept optimizes biological processes - Increased extraction from raw material, extended shelf life, reduced waste, and improved quality (taste, aroma, color, nutritional content) of the final product.

The positive effects of technology increase efficiency for our customers, provide better products for the consumers, and minimal impact on our environment. Through patented technology in PEF (pulsed electric field) and VI (Vacuum Infusion), the technology opens up new business opportunities for the food and plant industry worldwide. OptiCept's vision is to contribute to a sustainable world by offering efficient, green, cutting-edge technology that is easy to use in the areas of FoodTech and PlantTech.

The company is located in Lund and the share is traded on the Nasdaq First North Growth Market (ticker: OPTI). The Company's Certified Adviser is Tapper Partners AB.
