

Obducat is granted EUR 7.4 million in investment support from Portuguese IAPMEI for the expansion of its foundry business

Obducat has been granted 40% in investment support, equivalent to EUR 7.4 million, from the Portuguese authority IAPMEI to expand its foundry business (contract manufacturing based on NIL) in Portugal. The project, which is owned by the subsidiary Obducat Portugal, has a total budget of EUR 18.5 million and aims to build a new cleanroom and install advanced process equipment for the manufacture of components on behalf of customers, strengthening and expanding the production capacity of the company's foundry operations.

The investment support from IAPMEI is the maximum level that can be obtained for an individual project and will be possible call off gradually as the investments are carried out. To ensure the necessary conditions for the implementation of the project, Obducat has started the process of applying for capital from the Portuguese development bank BPF and at the same time addresses strategic project investors in Portugal for co-investment together with BPF. The Board of Directors makes decisions on investment when the necessary conditions are secured.

The project targets a significant increase in capacity in the foundry business, at a level of to approximately 4-5 times of the current capacity level, and introduces new process capabilities that strengthen Obducat's offering and competitiveness. Obducat's foundry services also drives the industrialization of nanoimprint lithography (NIL) and makes available the company's built-up expertise in the field. The expansion meets both the increased needs of existing customers and the growing market demand in optics, photonics, biomedical and sensor technology.

"This investment support creates a unique platform to expand our foundry business, enabling larger customer projects and strengthens Obducat's position in the market. Receiving the maximum level of support is a clear proof of our credibility and strength," says Obducat's CEO Patrik Lundström.

About IAPMEI

Covering all fields of industry except tourism, our mission is to promote competitiveness and business growth through the management of instruments and programs aimed at strengthening SME innovation, entrepreneurship and business investment. Read more at [IAPMEI - About us](#)

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of customers worldwide within the LED and Display, Optics and Photonics, MEMS and Sensor industries as well as in High Power and High Frequency electronics and Biomedical Devices. Obducat's technologies include nano imprint technology, resist- and wet processing technologies. Obducat has its own market presence in Sweden, Germany, Japan, USA, England, Portugal and China and the headquarter is located in Lund, Sweden. Obducat is a public company. The Obducat share is traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com or contact us via email investorrelations@obducat.com
