Fasadgruppen to deliver and install claddings in project in Luxembourg

Fasadgruppen's subsidiary Rokavate has signed a contract with Valmet Technologies Oy for delivery and installation of claddings to a large industrial building in Sanem, Luxembourg. The work will start in January and last until August 2023.

Rokavate's assignment includes the outer shell of the entire industrial building. The order value amounts to about EUR 2 million.

Rokavate was acquired by Fasadgruppen earlier this year as the group's first entry to the Finnish market. The company specialises in façade and roofing works for industrial buildings in general and power plants in particular, with projects carried out across northern Europe. The contract reflects Rokavate's strong position in its niche and marks Fasadgruppen's first project outside the Nordic countries.

Peter Polland, Business Area Manager Fasadgruppen NorthEast said: "We are happy to have been entrusted by Valmet Technologies to carry out this project in Luxembourg. Even though Fasadgruppen's home market is the Nordic countries, it is exciting to gain insights in other north European markets through our subsidiary Rokavate and we look forward to exploring new opportunities together."
