

## Realfiction invites interested parties to experience a multi-user glasses-free 3D game demo powered by its latest 7-inch DPT demonstrator

**Realfiction Holding AB ("Realfiction" or the "Company") invites shareholders, investors and other interested parties to attend a live demonstration of the Company's latest Directional Pixel Technology™ (DPT) demonstrator at its Copenhagen office on Thursday 18 June 2026 at 14:00 CET.**

The Company's latest 7-inch ferroelectric liquid crystal (FLC)-based DPT display format has the same form factor and pixel pitch as the 4-inch demonstrator presented at the Company's investor presentation on 6 February 2026. The demonstrator showcases further progress in the Company's multi-user DPT capabilities and is currently being used in commercial presentations to select potential commercial partners in Asia, where discussions regarding potential future applications of DPT have progressed beyond initial evaluations.

To enhance the viewing experience enabled by the larger 7-inch display format, Realfiction has developed an interactive game demo that allows multiple users to simultaneously experience individualized glasses-free 3D content on the same display.

The demonstration is intended to provide a firsthand opportunity to experience the latest developments in the Company's DPT technology and its potential future applications.

Shareholders, investors and other interested parties wishing to attend are requested to register in advance by contacting [investor@realfiction.com](mailto:investor@realfiction.com) no later than 16 June 2026.

The number of participants may be limited due to practical considerations.

**About Realfiction Holding AB**

Founded in Denmark in 2008, Realfiction is a provider of cutting-edge 3D display technologies designed for tomorrow's needs, featuring technological breakthroughs with its Directional Pixel Technology for LCD, OLED and microLED. These technologies support a wide range of use cases, including enhancing driving safety, medical imaging, immersive gaming and entertainment, digital signage, as well as applications in architecture, engineering, and design. The Company offers a comprehensive intellectual property portfolio tailored for OEMs and Tier-1 partners involved in developing and marketing displays for markets and industries requiring high-resolution multistereoscopic displays. All technologies are ready for licensing, and Realfiction is actively pursuing commercial licensing agreements and partnerships to pave the way to mass production. Realfiction's IP portfolio comprises 15 patent families and registered trademarks, including patent applications filed in multiple countries. Realfiction Holding AB's shares are publicly traded on Nasdaq Stockholm First North under the symbol "REALFI", with the share's ISIN code being SE0009920994.
