

## Elliptic Labs Ships Five Smartphone Models with Xiaomi and Transsion in February 2026

Oslo, Norway – Elliptic Labs (OSE: [ELABS](#)) is announcing that it has shipped the AI Virtual Smart Sensor Platform™ on five smartphone models in February 2026.

Xiaomi launched four smartphone models: the Redmi Turbo 5, Redmi Turbo 5 Max, Redmi Note 15, and Redmi Note 15 Pro smartphones. Transsion introduced one smartphone model: the TECNO POVA Curve 2 5G.

### **AI Virtual Proximity Sensor INNER BEAUTY**

Elliptic Labs' AI Virtual Proximity Sensor detects when a user holds their phone up to their ear during a call, allowing the smartphone to turn off its display and disable its screen's touch functionality. This keeps the user's ear or cheek from triggering unwanted actions during the call, such as hanging up or dialing numbers. Turning off the screen also helps conserve battery life.

Proximity detection is a core capability that is used in all smartphones, but Elliptic Labs' AI Virtual Proximity Sensor is a unique, software-only solution that delivers robust proximity detection without the need for a dedicated hardware sensor. By replacing hardware sensors with software sensors, the AI Virtual Proximity Sensor reduces device cost and eliminates sourcing risk.

## About Elliptic Labs

Elliptic Labs is a global Edge AI company delivering trusted, low-power on-device sensing at scale. Our AI Virtual Smart Sensor Platform™ enables intelligent, always-on contextual awareness directly on devices – without the need for additional hardware or continuous cloud processing.

Deployed in over 500 million devices worldwide, our platform powers software-defined sensing across a broad range of consumer and enterprise products. By executing compact neural networks directly on-device, our technology delivers adaptive, real-time sensing that preserves user privacy while minimizing power consumption.

For more than a decade, Elliptic Labs has specialized in efficient neural network execution using proprietary runtimes and custom-built sensing models optimized for real-world environments. Built on balanced, self-collected datasets and engineered to operate across diverse hardware architectures, our AI Virtual Smart Sensors enable seamless integration across product generations and device categories.

Our solutions enhance security, personalization, productivity, and user experience – forming a scalable foundation for the next generation of AI-enabled devices.

Headquartered in Norway, with a presence in the USA, China, South Korea, Taiwan, and Japan, Elliptic Labs is listed on the Oslo Stock Exchange. All technology and intellectual property are developed in Norway and are solely owned by the company, ensuring independence and long-term innovation.
