

CTT Systems receives Inflight Humidification VIP system order for one Boeing BBJMAX8 aircraft from AMAC Aerospace

CTT SYSTEMS AB ("CTT"), the market leader of aircraft humidity control system, announces Inflight Humidification ("IFH") VIP system order from AMAC Aerospace for one Boeing BBJMAX8 aircraft. The IFH VIP system is designed to increase humidity in the entire aircraft cabin, which requires support from three humidifiers. The BBJMAX8 aircraft will be moisture protected with CTT's unique Anti-Fuselage-Condensation technology. The system is scheduled to be delivered to AMAC in Q2 2022. Based on list price, the order value is 4 MSEK. This is CTT Systems' 97th Inflight Humidification award for VIP aircraft (from Airbus ACJ and Boeing BBJ).

"We look forward to work together with CTT once again in a VIP completion project. Cabin humidification is a common request from our VIP clients that value good health, wellbeing and feeling at ease during and after flight," comments Tracey Hawthorne-Kurz, Director Logistics & Purchasing at AMAC Aerospace Switzerland.

"We are pleased to cooperate with AMAC Aerospace in fitting in our IFH system in another BBJMAX VIP completion," says Peter Landquist, Vice President Sales & Marketing at CTT Systems.

About humidification on VIP and large-cabin business jets

Without an efficient humidification system, the cabin air in the VIP aircraft or large, cabin business jet is far more dehydrating than any place on Earth – below 5 % Relative Humidity (RH). This Boeing BBJMAX8 will have a striking humidity increase, restored to comfort and wellbeing level, to approx. 20 % RH. VIP passengers will on long-haul flights benefit from reduced dry air related problems (read: fatigue, jet-lag, red eyes, dry throat, dry skin, spread of virus diseases) and improved wellbeing and general sleep. The CTT humidifier is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria. The CTT IFH VIP system offers total anti-condensation protection.

About AMAC

AMAC Aerospace is offering narrow and wide-body VIP Completion and Maintenance for the corporate/private aviation market. The company was founded in 2007 in Basel, Switzerland. Today the company is the largest privately-owned facility in the world and led by Kadri Muhiddin, Executive Chairman/Group CEO, Bernd Schramm, Group COO and Mauro Grossi, Group CFO. The successful progress attests to the commitment to excellence. With long-term industry engagement, deep industry roots, extensive experience and strong international network, the AMAC team collaborates to exceed the expectations of clients, airworthiness authorities and original equipment manufacturers. www.amacaerospace.com

About CTT Systems

CTT is the leading supplier of active humidity control systems in aircraft. We solve the aircraft humidity paradox - with far too dry cabin air - and too much moisture in the fuselage - causing dehydration for people onboard and excess weight in the aircraft inducing larger environmental footprint. CTT offers humidifiers and dehumidifiers available for retrofit and line-fit on commercial aircraft as well as private jets. For more information about CTT and how active humidity control products make air traveling a little more sustainable and far more pleasurable, please visit: www.ctt.se
