Digicel Deploys Enea AdaptiveMobile Security to Protect Mobile Networks in 26 Caribbean and Central American Markets

Non-Regulatory Information

Enea the world leader in mobile network security, today announced that Digicel Group has deployed Enea AdaptiveMobile Security's comprehensive signaling security solution to protect mobile networks and subscribers in 26 markets across the Caribbean and Central American region. Using the Enea AdaptiveMobile Security SS7 and Diameter signaling security platform, together with unique threat intelligence services, Digicel ensures unrivalled protection for its networks and subscribers in each country.

Bad actors and fraudsters exploit technical vulnerabilities to breach subscriber privacy, to deny access to services and to directly defraud both mobile operators and subscribers. Enea AdaptiveMobile Security's award-winning signaling security firewall and threat intelligence solutions protect networks using signaling protocols such as SS7 and Diameter from continuous attack. This offers domestic and roaming subscribers protection from new and emerging cybersecurity threats.

"We are an operator group that places our commitment to security at the core of our operation, adopting a zero-trust interconnection strategy," said Krishna Phillipps, Group CTO, Digicel. "After a thorough evaluation of the best possible partners to help us deliver on this vision, we selected Enea AdaptiveMobile Security's security platform and threat intelligence services to continue protecting our networks against today's threats and those we'll face tomorrow."

"Threat actors are well versed in penetrating unprotected mobile networks. As a result, it is critical that mobile operators work to actively secure vulnerable network infrastructure and maintain a managed defense. This level of security will be a clear differentiator for Digicel across all its markets", said Brian Collins, SVP, Security, Enea AdaptiveMobile Security. "Our signaling security platform is enhanced by our unique signaling threat intelligence; we are continuously detecting and protecting against new threats and techniques used by sophisticated bad actors manipulating multiple network protocols. Our intelligence is extracted from over 50 billion signaling events globally every day. We are delighted to be working with Digicel to help secure their networks and subscribers."

About Digicel

As a Digital Operator, Digicel is in the business of delivering powerful digital experiences 1440 minutes of each day to customers – that's every minute, all day, every day.

Through its world-class LTE and fibre networks, together with its suite of 8 apps spanning sports (SportsMax), music (D'Music), news (Loop), local radio and podcasts (GoLoud), TV streaming (PlayGo), enhanced messaging and marketplaces (BiP), cloud storage (Billo) and self-care (MyDigicel app), Digicel is the only operator in its markets that can deliver that.

Serving consumer and business customers in 32 markets in the Caribbean, Central America and Pacific, its investments of over US\$7 billion and a commitment to its communities through its Digicel Foundations in Haiti, Jamaica, Papua New Guinea and Trinidad & Tobago have contributed to positive outcomes for over 3 million people to date.

With its Better Together brand, Digicel is making a promise of simply more to customers and communities and its 7,000 employees worldwide work together to make that a powerful reality day in, day out.
