

Ortivus presents its operations and future market opportunities

Until 10 October, existing and new shareholders have the opportunity to subscribe for shares in Ortivus' rights issue. To support this decision, the company has prepared the presentation "*Care outside the hospital*", in which CEO Gustaf Nordenhök provides an in-depth overview of Ortivus' business, market, and growth opportunities.

Today, healthcare systems both in Sweden and internationally face significant challenges, including rising care demands, limited resources, and increasing requirements for patient safety. Ortivus offers proven digital solutions that contribute to more efficient use of resources, improved care workflows, and a more sustainable healthcare system.

About Ortivus

Ortivus has extensive experience in mobile communication solutions and a unique understanding of clinical healthcare. We develop interactive and user-friendly solutions that support diagnostics, increase efficiency, and deliver long-term cost savings for healthcare providers. By integrating our solutions with electronic health records, dispatch systems, and national registries, we ensure fast and secure information management, a crucial factor in creating a more integrated care process.

Our solutions save valuable time for healthcare professionals, optimise resource use, and reduce the need for avoidable patient transports, resulting in more cost-effective and patient-centred care. With our combination of advanced technology and deep clinical expertise, we support our customers in meeting the healthcare challenges of today and tomorrow.

Ortivus Class A and Class B shares are listed on the NASDAQ First North Growth Market and the company's Certified Adviser is FNCA Sweden AB.
