

Diadrom to demonstrate DiagStudio at DALO Industry Days 2026

Diadrom Holding AB (publ) will exhibit at DALO Industry Days 2026 on 19 and 20 August at MCH Messecenter Herning, Denmark. At stand D 3031, Diadrom will demonstrate DiagStudio, the company's platform for software lifecycle control in complex, software-intensive systems.

DALO Industry Days, hosted by MCH on behalf of the Danish Defence Acquisition and Logistics Organization (DALO), is Scandinavia's largest defence industry exhibition and brings together the Danish Armed Forces, defence procurement and the national and international defence industry.

Modern defence platforms contain more software, more variants and more suppliers than ever before. As fleets grow and systems evolve, every individual unit can end up with its own combination of hardware, software versions, configurations and update history. DiagStudio gives defence organisations control of exactly what software is running where, resulting in fewer unknowns, faster impact analysis and better control of the software lifecycle across the fleet.

Diadrom brings more than 25 years of diagnostics experience from the automotive industry, with software deployed in more than 250,000 vehicles and in defence service since 2012 for customers such as Saab Bofors Dynamics, BAE Systems Bofors and FMV.

"Defence is becoming software-defined, and with that comes an operational question that sounds simple but rarely is: do you know what software is running where? We have helped the automotive industry answer that question for 25 years. At DALO, we look forward to showing what that control looks like in practice," says Viktor Eliasson, CEO of Diadrom Holding AB.

Visitors can meet Diadrom at stand D 3031 or book a meeting in advance via the DALO Industry Days exhibitor platform: <https://www.daloindustrydays.com/exhibition/udstillere/udstiller/diadrom>.
