

Xplora Technologies AS – Release and first customer orders of HMD Fusion X1 smartphone

Oslo, 5 June 2025 – Xplora Technologies AS ("Xplora") announces the release and it's first customer orders of the HMD Fusion X1 smartphone.

The HMD Fusion X1 is the first product developed as part of the strategic partnership between Xplora and HMD, which was announced on 29 October 2024. The device addresses the urgent challenges of teenagers' digital habits, the need for parental control, online safety, and more responsible smartphone use.

"On the same day that the Norwegian Directorate of Health publishes new guidance on screen time, we're releasing the Fusion X1. It's a timely reminder of the growing need for responsible digital tools tailored to young users." says Sten Kirkbak, CEO and Founder of Xplora Technologies AS. "At Xplora, our mission has always been to onboard children—and now teens—into the digital world in a safer, more balanced way. Partnering with HMD on the Fusion X1 lets us extend that mission into smartphones, providing teens with the freedom they seek and the protection parents' trust. Together, we're shaping a safer, healthier digital future—one smart step at a time."
