### About Oasmia Pharmaceutical AB

Oasmia Pharmaceutical AB develops, manufactures, markets and sells an improved generation of drugs within human and veterinary oncology. Oasmia produces novel formulations of well-established cytostatic agents which show improved performance, an improved side-effect profile and a wider range of therapeutic areas compared with existing alternatives. Product development is based on Oasmia's proprietary technology platform XR17. Oasmia has been successful in driving its first product candidate, Apealea® (paclitaxel micellar), through clinical development, and has applied for and achieved market approval in the European Union and other territories. Oasmia is in the process of transitioning into the commercialization phase of the product Apealea® and making the product accessible to patients via its partnership with Elevar and its existing operations and partnerships in its retained territories.
