

Bim.com launches new Design App for Autodesk Revit

Bim.com takes the next step in supporting architects, engineers, and constructors (AEC) with the launch of a new integrated Revit app. This solution is based on previous technology developed by BIMObject and developed with the goal of optimizing workflows and enabling more time for creativity and design, instead of administration and complex calculations.

As a part of our new platform solution Bim.com we are launching an app which integrates BIMObject and Prodikt functionality into one single workflow for our users. The new app is providing users with quick and direct access to environmental data for their projects. By connecting Revit with the Bim.com ecosystem, AEC professionals can make more informed decisions in real time and reduce project environmental impact from the early stages in a seamless way.

"Our ambition is to meet our users where they work and offer solutions to empower them to work with data driven design decisions. With this app, we aim to streamline the workflow in Revit and provide access to the data needed to make sustainable and well-informed choices," says Johan Dyrssen, Product Manager.

The app is in its early development stage and will initially be available to existing AEC customers in Sweden that are currently working with Prodikt. As Bim.com and the app continue to evolve, features will be added with the goal of further improving and simplifying our users' workflow. The app is planned to be launched to additional markets during the year.

About BIMObject

BIMObject connects and digitizes the construction industry, so we can build smarter, faster and greener.

bimobject.com, our global marketplace for building products, helps millions of architects and engineers every year to find the right products and information for their projects. Our tools for sustainable construction (prodikt.com) help large property owners understand and minimize their impact on the environment. Together we build a better world.

BIMObject's shares are traded on Nasdaq First North under the ticker: BIM.
Certified Advisor: FNCA Sweden AB
