

FlexQube receives order of approximately USD 1 million for new AMR project with significant future potential

One of the world's largest e-commerce and logistics companies, based in the U.S., has placed an order worth approximately USD 1 million for long lead-time items used in products within FlexQube's Navigator AMR system. The order is linked to a new customer project in which FlexQube's Navigator AMR system is being evaluated for a potentially larger application within the customer's operations.

FlexQube has previously received smaller orders for products related to the initial pilot phase of the project, which is planned to take place during the summer of 2026. The newly received order has been placed to secure access to critical components ahead of a potential expanded pilot phase later in the year. The potential expanded pilot phase corresponds to a potential order value for FlexQube of approximately USD 5.5 million during the autumn of 2026.

Such an expanded pilot phase is, however, dependent on, among other things, the outcome of the initial pilot phase and the customer's subsequent commercial decisions. FlexQube also sees significant potential related to continued deliveries within the framework of the same customer project over the coming three years.

CEO Anders Fogelberg comments: *"This is an important step in a new, potentially very large AMR project. The order we have now received secures long lead-time components ahead of a planned expanded pilot later in the year. The project demonstrates the scalability and commercial potential of FlexQube's Navigator AMR platform."*

About FlexQube

FlexQube is a technology company headquartered in Gothenburg, Sweden with subsidiaries in USA, Mexico, Germany and England. FlexQube offers solutions for cart-based material handling using a patented modular concept. FlexQube develops and designs customized solutions for both robotic and mechanical cart logistics. Through the own developed and unique automation concept FlexQube can offer robust and self-driving robotic carts. FlexQube has more than 1300 customers in 40 countries with primary markets being North America and Europe. FlexQube's customers can be found within the manufacturing industry, distribution- and warehousing. We represent some of the most successful companies in the world with a significant share being represented on the Fortune 500 list. These companies exist within automotive, electric vehicle manufacturing, online retail, heavy-duty trucks, industrial automation and retail logistics.
