

## Effnet licenses its header compression software for advanced research

Luleå 2026-01-19 - Effnet AB, a subsidiary of Effnetplattformen Holding AB and the premier provider of header compression software for wireless and fixed networks, announces that it has licensed its header compression software to a Singapore-based defence research organization collaborating with a technological university in Singapore for use in advanced communications research. The one-time license fee from the agreement will bring a limited positive financial contribution in this quarter.

Effnet's header compression technology is deployed worldwide across cellular/mobile, satellite, industrial, enterprise and defence-related communications systems. In defence and security environments, including ad-hoc and mobile networks where bandwidth, latency and link reliability can be constrained — such as tactical communications or unmanned aerial vehicles — efficient and robust header compression can help optimise network performance while keeping system resource usage low. The software is standards-compliant with IETF and 3GPP specifications (3G /4G/5G), proven interoperable, and designed to deliver high compression efficiency with low computational overhead.

### About Effnet

*Effnet AB, based in Sweden, develops and licenses its 5G RAN software, 5G protocol stack for terminals, ASN.1 5G Toolset and IP header compression software including Effnet ROHC and Effnet BHC. Effnet's 5G RAN software is highly scalable, modular and containerized. It is targeted for use in everything from small cells to disaggregated RAN and Cloud-RAN. With support for standardized and open RAN interfaces as well as Effnet's focus on performance, the software is highly versatile and suitable for use in various applications ranging from wireless broadband to industrial IoT and vehicular communications. For more information about Effnet and its products, please visit [www.effnet.com](http://www.effnet.com).*

### About Effnetplattformen Holding AB (publ)

*Effnetplattformen Holding AB (publ), reg.no. 559179-8342, is the parent company of a group active in advanced digital communications and investments in other growth companies. Effnetplattformen Holding AB (publ) is traded on Nasdaq First North Growth Market under the ticker EFFH and its certified adviser is Eminova Fondkommission AB, +46 (0)8-68421100, [info@eminova.se](mailto:info@eminova.se), [www.eminova.se](http://www.eminova.se). For further information about Effnetplattformen Holding AB (publ) please visit [www.effnetplattformenholding.se](http://www.effnetplattformenholding.se).*
