Gapwaves to host an online company presentation and Q&A session

Gapwaves AB (publ) invites existing and potential shareholders to an online company presentation followed by a Q&A session. CEO Jonas Ehinger will discuss the company's ongoing industrial scale-up and how the current rights issue of approximately SEK 62.3 million is intended to help accelerate the next phase of growth.

Gapwaves has progressed from technology development and industrialisation to established high-volume production. The total annual volume of antennas based on the company's technology, including production under licence, is expected to increase from approximately 4.5 million in 2026 to approximately 10 million in 2027.

During the presentation, Jonas Ehinger will highlight, among other topics, the growing collaboration with Valeo, the recently announced development order from a new customer that ranks among the world's five largest Tier 1 automotive suppliers, and opportunities in defence and counter-drone solutions.

CEO Jonas Ehinger comments:

"*We are at a very exciting stage in Gapwaves' development. After several years of investment in technology and industrialisation, we have now established high-volume production and see significant growth opportunities in both existing and new global customer programmes. The latest development order from another of the world's largest Tier 1 suppliers demonstrates the potential to secure further significant high-volume business alongside our existing business with Valeo, HELLA and Desay SV.*

I look forward to sharing more about our commercial progress, why we believe we are well positioned to gradually improve our financial performance, and how greater financial flexibility can help us accelerate the next phase. We welcome both existing and new shareholders to participate and ask questions."

Date, time and registration

Date: Tuesday, 1 December 2026

Time: 12:30–13:15 CET

Venue: Online presentation via Zoom

Registration: https://us02web.zoom.us/webinar/register/WN_ROc4LjvZQDmA3TbjG1QRgw

About Gapwaves AB (publ)
Gapwaves AB (publ) develops wireless solutions based on unique and patented waveguide technology for millimetre-wave applications. Our products are primarily used in antennas for radar systems enabling autonomous driving and advanced safety solutions within the automotive industry. Through collaborations with leading players in the sector, we contribute to the development of safer and more efficient transport systems. The technology is cost-efficient, combines high performance with a compact design and is also suitable for industrial automation, telecommunications, smart cities, and civil-military applications – areas where precision and reliability are crucial. Gapwaves was founded in 2011 from research at Chalmers University of Technology and is listed on Nasdaq First North Growth Market Stockholm (GAPW B).
