

Ponsse Plc chose One Timber Weighing Link from Tamtron Group Plc for the technology of their new crane scale system – the next-generation solution enhances the efficiency of forestry industry

Tamtron Group Plc | Press Release | August 14, 2024 at 10:00:00 EEST

Ponsse Plc, manufacturer of cut-to-length forest machines, has chosen Tamtron's wireless One Timber weighing link for the technology of their new crane scale system, PONSSE Scale. The supplier selection strengthens Tamtron's position as a global weighing solution provider, offering precise and reliable solutions for weighing wood materials. Ponsse Plc introduced the new scale system to its customers and partners on 14th of June 2024 at a launch event in Sweden.

The operation of One Timber weighing link is based on strain gauge weighing technology, which is known in the market for its precision and reliability. This technology has gained great popularity as a weighing solution for timber cranes worldwide. The link supplied by Tamtron is designed for the demanding conditions of the forestry industry. Together with a modern weighing software, the link guarantees accurate and reliable weighing results in all conditions. The scale sends the weighing data forward to the user interface of Ponsse's forwarder.

Tamtron's CEO, Mikko Keskinen, comments on the successful collaboration: « We are proud that Ponsse Plc chose Tamtron's One Timber Link as the technology for their new crane scale system. The choice signifies trust in both Tamtron's expertise and quality of our products. Ponsse Plc is an important customer to us, and this cooperation supports our company's organic growth remarkably. We would like to thank Ponsse Plc for their trust in Tamtron. »

Tamtron is a well-known and long-term operator in the global markets of industrial weighing. Tamtron continuously develops its solutions by utilising the latest technologies to support changing customer needs. The established market position and the reputation of Tamtron as an innovative and reliable supplier, were significant factors in Ponsse Plc's decision to choose Tamtron's link as the new technology for the scale system.

« Based on the feedback from pilot customers of PONSSE Scale, the accuracy and reliability of the weighing results in forest sites are at an excellent level with the Tamtron link », tells Markko Savolainen, Product Manager, Equipment Automation from Ponsse Plc.
