

Ortivus is granted market approval for MobiMed Monitor in Australia

Ortivus expands prehospital care capabilities in Australia together with Trapeze Group

Ortivus is happy to announce the market approval of MobiMed Monitor in Australia. The company's application to include MobiMed in the Australian Register of Therapeutic Goods (ARTG) was successful and Australia's Therapeutic Goods Administration (TGA) has given its approval. This means that the company are now permitted to market and sell MobiMed Monitor, complementing MobiMed ePR to deliver a complete prehospital care solution in Australia.

"Australia and New Zealand are important markets to us and our extensive experience from the UK has made us well prepared to deliver systems to the NZA region. We have delivered MobiMed for over three decades to customers in Europe, with continuous in-house development at our headquarters in Stockholm. Together with Trapeze, we'll have a strong local presence for support in New Zealand and Australia." says Magnus Mårtensson, Chief Product Officer at Ortivus.

Earlier this year, Ortivus announced the entry of a strategic partnership with Trapeze Asia Pacific Pty Ltd, a company that is well established in the NZA region. Trapeze and Ortivus will work together in delivering MobiMed to the Australian and New Zealand markets.

"Paramedics depend on current and timely data to achieve the best clinical results. The future of healthcare is centered on people with treatment innovation. In our vision of this future, process automation, enriched data, and analytics, as well as improved technology domains, delivers better health outcomes. Collaboration is key to merging ideas and opening markets to technology innovation." James Wetherall, Managing Director Emergency Services at Trapeze.

About Trapeze Asia Pacific Pty Ltd

Trapeze enables seamless communication between your control centre, paramedics, ambulances, and hospitals – supporting organisations to meet response targets, increase paramedic safety and wellbeing, improve clinical handover, and deliver on community expectations. The innovative technology includes real-time vehicle status, location updates, shift management, asset management and clinical handover.

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 3.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
