

Polarium's Generation 6 Battery Awarded iF Design Award 2023

Generation 6 of Polarium's Product range Battery has been awarded the iF Design Award 2023 for outstanding design services.

Since the launch of its Battery product range in 2015, Polarium has maintained a high pace of innovation to develop state-of-the-art sustainable energy storage and optimization solutions built on lithium-ion technology. In 2022, the company launched Generation 6 of Battery, which is prepared for whatever the future may hold. The Generation 6 of Battery is smarter, stronger and safer than ever before – and due to its modular design, the battery can easily be tailored after the customer's specific needs.

The Generation 6 of Battery has been awarded the world-renowned design prize iF Design Award for its outstanding design services in the Product discipline of the Industry/Tools category. The iF Design Award was awarded by a 133-member jury, consisting of independent experts from all over the world, with its smart aesthetic and easily adaptable modular battery technology.

"We are of course very thankful for this award. It is a great endorsement for our dedicated product team. Our product development is driven by innovation and dedication to maximize value creation for our customers, and smart design is an integral part of that process," says Stefan Jansson, CEO of Polarium

The iF Design Award, whose origins date back to 1954, is annually conferred by the iF International Forum Design. For the 2023 iF Design Award, almost 11,000 entries were submitted from 56 countries in hopes of receiving the seal of quality.

About Polarium

Polarium is a leading energy storage developer. We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial and industrial facilities across the world. Polarium was founded in 2015 on the conviction that safe, smart and sustainable energy storage solutions will be key to empower the transition to a truly, sustainable energy future. We are an impact

business contributing to the sustainable energy transformation by enabling renewables, electrification and intermittent power supply.

Our cutting-edge and easily adaptable modular battery technology enables us to be in the forefront of developing state-of-the art sustainable energy storage and optimization solutions for today - and tomorrow. Polarium is a fast growing, profitable entrepreneurial company headquartered in Stockholm, with production in Mexico, South Africa and Vietnam, customers across the world from Ghana to Svalbard and 600+ employees.
