## Update: Launch of Ovzon 3 now targeted for early January

**Due to continuous unfavorable weather conditions, Ovzon's revolutionary geostationary communications satellite is now targeted to lift off from Cape Canaveral Space Force Station in Florida no earlier than early January 2024.**

"Launch of Ovzon 3 is now targeted for early January 2024 due to continuous unfavorable weather and as a result of shifts in the launch schedule. While weather is out of our control, the spacecraft remains healthy, and we continue to work closely with SpaceX to prepare for launch in early January. This shift does not affect the roll-out of our unique next generation SATCOM-as-a-Service offerings", says Per Norén, CEO of Ovzon.
