

Knowit Named a Winner of 2025 Nordics AWS Partner Awards

Knowit, a leading Nordic digital transformation partner, today announced that it was named a winner of the 2025 Nordic Amazon Web Services (AWS) Regional Partner Award, an award recognizing partners in the Nordics that play a key role helping customers drive innovation and build solutions on AWS.

AWS Regional Partner Awards recognize AWS's Top Partners of the Year and Rising Star Partners of the Year in Nordics, whose business models have embraced specialization, innovation, and collaboration over the past year. AWS Partner Awards recognize partners whose business models continue to evolve and thrive on AWS as they work with customers. Winners were selected based on objective criteria with results audited by third-party analyst firm, Canalys.

"We are proud to be recognized by AWS with this award. This has been achieved through dedication and collaboration across Knowit. Our long-standing collaboration with AWS in the Nordic region has enabled us to build innovative and resilient solutions that deliver strong business value for our clients. Together with AWS and our customers, we are unlocking new possibilities driven by the rapid development of AI, creating smarter, more sustainable, and future-ready solutions," says Per Wallentin CEO Knowit.

Knowit has strengthened its collaboration with Amazon Web Services (AWS) by expanding the portfolio of offerings available in AWS Marketplace (a digital catalogue for customers). The new listings highlight Knowit's growing focus on innovation, automation, and industry-specific value creation on AWS.

During the past year, Knowit has launched several new solutions in AWS Marketplace that address emerging customer needs across creative, gaming, and cloud operations domains. One such solution is Knowit Cloud FinOPS, a professional services offering that embeds AWS Well-Architected cost-optimization best practices into cloud-financial management, helping organizations achieve cost transparency and operational efficiency. This solution is used within Tet Digital. Tet Digital AS develops digital solutions for sustainable mobility in Norwegian public transport.

"Knowit stands out by combining deep AWS expertise with a clear understanding of our business objectives. They are a strategic partner that delivers excellent services and actively contributes to strengthening our technological position." Says Endre Sundsdal, CEO Tet Digital

By bringing offerings to AWS Marketplace, Knowit makes it easier for customers to discover, procure, and deploy specialized solutions directly within their AWS environments. The listings also underscore Knowit's commitment to developing repeatable, productized solutions that complement its long-standing strengths in migration, modernization, and managed services.

The AWS Partner Network (APN) is a global partner program, focused on helping partners build successful AWS-based businesses or solutions by providing business, technical, marketing, and go-to-market support. The APN includes independent software vendors (ISVs) and systems integrators (SIs) around the world, with AWS Partner participation growing significantly during the past 12 months.

About Knowit

Knowit are digitalization consultants with a vision to create a sustainable and humane society through digitalization and innovation. Knowit supports its clients in the digital transformation and stands out among other consultancy firms through its decentralized organization and agile work methods in client assignments. The operations are divided into four business areas – Solutions, Experience, Connectivity, and Insight – which offer services in bespoke system development, digital customer experiences, the internet of things, cloud, cybersecurity, and management consultancy. Competences from several business areas are often combined in client projects. Knowit was founded in 1990 and now has around 3,800 employees, mainly in the Nordic countries, but also in operations in Germany and Poland.

Knowit AB (publ) has been listed on the stock market since 1997 and is currently listed on Nasdaq OMX Stockholm Mid Cap. For more information about Knowit, please visit [knowit.eu](https://www.knowit.eu).
