

# Telia presents the robot weeded 5G-löken

Today, Telia introduced 5G-löken, a yellow onion where weed control is managed using an autonomous robot from Ekobot instead of traditional chemical pesticides. These onions last longer and require fewer pesticides. They also taste significantly better, as attested by Gustav Leonhardt, winner of the 2021 Chef of the Year and Sweden's representative at the 2024 Bocuse d'Or.

For more information on 5G-löken and the project, visit Telia's website: <https://5g-loken.telia.se/>

## About Ekobot

---

Ekobot AB (publ), based in Västerås, conducts business based on the business concept of developing, manufacturing and selling autonomous agricultural robots that enable efficient precision cultivation where weed management takes place completely without or with minimal use of herbicides. The company's vision is to provide the agricultural sector with a long-term sustainable alternative for reducing or completely eliminating chemical spraying in crops of crops for human consumption. The company is listed on the Nasdaq First North Growth Market.

For more information, see Ekobot's website [www.ekobot.se](http://www.ekobot.se)

Augment Partners AB, tel. +46 8 604 22 55, e-mail: [info@augment.se](mailto:info@augment.se) is the Company's Certified Adviser.
