

## Prostatype Genomics' CEO on the road to Medicare approval in filmed company presentation

**Prostatype Genomics AB announces that a filmed company presentation in which CEO Fredrik Rickman talks about the commercialization in the United States of the company's gene test Prostatype® is now available. The test was launched in the US earlier this year, and the company expects it to be included in Medicare's reimbursement system in Q4. This would enable more extensive use in the world's largest single market with annual sales of approximately SEK 2 billion.**

Prostatype Genomics is conducting a preferential rights issue with subscription period until September 2, 2024 to finance commercialization activities in the United States and in selected markets in Europe.

Watch the filmed company presentation and read more about the rights issue on the company's [rights issue webpage](#).
