

Diadrom Joins FKG

Diadrom Systems AB, a wholly owned subsidiary of Diadrom Holding AB (publ), is a leading software company developing services and products within diagnostics for Autotech and Autodefense. The company has now chosen to join the Scandinavian Automotive Supplier Association (FKG) – the industry organization representing approximately 300 member companies supplying the automotive sector in Scandinavia.

"We are in the midst of a technological revolution where Sweden has the opportunity to take the lead. Our ambition is to ensure that the Swedish automotive and defense industries not only keep up – but lead the way."

– Viktor Eliasson, CEO, Diadrom Holding AB

Membership in FKG is a strategic step for Diadrom, providing the company with a platform to influence developments in two rapidly growing and transforming sectors: the automotive and defense industries.

"FKG is thrilled that Diadrom has chosen to become a member! It is a fantastic addition to the network and an exciting company to build a deeper relationship with – for support and discussions in an exciting and ever-changing industry. With shared values and a forward-leaning vision for the future, this is a collaboration that will strengthen us on every level."

– Gabriella Virdarson, Communication & Strategy Officer, FKG

In addition to its extensive expertise and strong network within the automotive industry, FKG also works to enhance the defense industry's understanding of the capabilities and competencies of its members. This aligns with Diadrom's strategy to help the defense sector modularize, scale, and build secure IT processes and software to meet the industry's rapidly growing need for increased delivery capacity.

"First and foremost, I am very pleased to join an organization that delivers significant value to both the industry and Sweden as a whole. We have been in dialogue with FKG for several years and have participated in their booths at trade fairs such as IAA Mobility. The decision to now join gives us a strong platform to influence and contribute to an industry in rapid transformation – as well as to take part in upcoming projects, including their defense initiatives. This will strengthen Diadrom's offering and competitiveness going forward."

– Viktor Eliasson, CEO, Diadrom Holding AB
