ANNUAL REPORT AND CONSOLIDATED FINANCIAL STATEMENT FOR GO NORTH GROUP AB

The Board of Directors and CEO of Go North Group AB hereby submit the Annual Report for the fiscal year 2024-01-01 - 2024-12-31.

MANAGEMENT REPORT

Information about the business

Go North Group AB was founded as an Amazon aggregator, acquiring a portfolio of brands which primarily sold products on Amazon in the USA. Based in Sweden, Go North is now focused on bringing consumers simple, yet impactful, solutions to everyday problems. The Go North Group operates globally, and in 2024, the USA accounted for 89% of total sales.

Ownership structure

Go North Group AB is 100% owned by Go North Group Holding AB, which also holds all the votes for the company.

For the full year 2024, the group received no shareholder contributions.

Significant events during the financial period

During 2024, Go North did not acquire any new brands and instead focused on optimizing and building off of its current business.

During the first quarter Go North Group AB was able to renegotiate the interest rates on existing bonds and issue new senior bonds in the amount of USD 26,180,000 and new subordinated bonds in the amount of SEK 15,000,000. This new agreement resulted in the existing bonds being reclassified as long-term debt in Q1 2024. The agreement also included that 20% of the shares in Go North Group AB would accrue to remaining bondholders through a set-off issue of convertible bonds. These bonds would convert to preferential shares in the event of an exit which would have 1 vote per share, while common shares have 10 votes per share. After the issuance, all bonds are either classified as junior bonds or senior bonds.

During the second quarter Ryan Looysen started as the CEO of Go North. The former CEO Johan Hallenby took on a new role and became the Chairman of the Board of Go North, as the former Chairman of the Board, Alexander Hars, left the board. In connection with both the CFO and Finance Director moving on to new opportunities after the close of the second quarter, Go North made the decision to merge these two roles into the CFO role. The position was filled with an internal recruitment.

In April 2024 Go North reached a settlement with the previous owners of one of its brands, which included returning the brand to the previous owners. The brand had net sales of 3,359 KSEK in Q1 2024, which was around 2.5% of total net sales, with a profit contribution of -122 KSEK.

Due to lower-than-anticipated profitability and diminished sales performance that continued into the first quarter, an impairment occurred in the form of a write-down of brand assets of 21 brands, totaling KSEK 193,165 in Q1. This impairment resulted in negative equity in the parent company, after which the Board of Directors established a balance sheet for liquidation purposes in June 2024. In addition to the parent company, four subsidiaries established balance sheets for liquidation purposes at the same time, due to poor sales and profitability.

Further significant impairments in the form of a write-down of brand assets occurred in the second quarter due to continued under-performance of certain brands, totaling KSEK 109,426 in Q2 for nine brands. At the same time a reversal of previous impairments on nine brands occurred of KSEK 39,686, due to improved sales and profitability which raised the forecasted trajectory of the brands' performance. During the third and fourth quarters, as Go North saw steady improvement of many brands, reversals of previous impairments were made, as well as some further impairments of other brands which continued to underperform. The net effect of these impairment bookings totaled a net reversal of impairment of KSEK 13,890 in the third quarter and a net further impairment of KSEK 3,752 in the fourth quarter. The fourth quarter net further impairment was due in large part to an increase in the estimated weighted average cost of capital in the discounted cashflow model used to estimate the brand values for impairment testing, not due to underperformance of brands.

In order to build sales growth and spread risk, during the third quarter Go North began selling on Walmart, extending its product offer, expanding deeper into Europe on Amazon and developing its own e-commerce site www.gonorthshop.com, which launched to the US market in November. To facilitate these new initiatives, Go North reorganized internally into a category structure based around its products offered: Lifestyle and Personal Care, Home and Garden, and Pet and Animal. In addition to the categories are support functions.

Due to extremely high debt with unsustainable interest rates between 11-15%, negative equity in the parent and four subsidiaries and the related establishment of balance sheets for liquidation purposes, Go North Group AB filed for reconstruction with the Swedish courts on September 12, 2024. The Swedish courts accepted the application on September 16, 2024 and appointed Magnus Löfving as the legal administrator of the reconstruction. The reconstruction has enabled an extension of the deadline for resolving the negative equity in Go North Group AB to be two months after the reconstruction ends.

The reconstruction process requires all outstanding debt in the parent company to be frozen as of the reconstruction date, to allow for the process of renegotiating outstanding debt to levels which can be carried by the ongoing business. The reconstruction is ongoing as per the date of this consolidated annual report. A previous owner from which Go North purchased one of its brands, has filed a claim against the company in the United States. The matter has been stopped by the United States court due to the reconstruction. The claim will be treated as an unsecured claim in the reconstruction. It is at this point uncertain how the matter will be handled and resolved by United States court after the end of the reconstruction.

Significant events after the end of the financial period

Go North Group AB has applied for an extension of the reconstruction deadlin, which expired in mid-June. Go North's negotiations with creditors in the reconstruction process are ongoing. An extra shareholder meeting has been called for April 22, 2025 to hear and decide upon a proposal to be put forth by bondholders regarding the outstanding debt.

Equity was restored in two out of four subsidiaries which had previously established balance sheets for liquidation during 2024. The Board took a decision in February 2025 to liquidate the other two subsidiaries, as they have no active business.

Go North made further internal reorganizations during 2025 and as part of that process outsourced its finance function in Sweden.

Expected future development and significant risks and uncertainties

Go North is in a challenging financial position, facing major current risks in capital structure and liquidity risks, which the company would like to address during the reconstruction process. It is uncertain whether Go North will have enough liquidity to fulfil its financial obligations and finance its ongoing business in the coming periods. If the negative equity in the parent company cannot be restored by negotiating down debt, it will be forced to liquidate according to Swedish law.

Operationally, Go North is seeing improvement in the performance of its products, and is optimistic about its continuing stream of new product development, further expansion into Amazon Europe and Walmart.

The risks related to operations, liquidity, financing and contracts together result in significant uncertainty regarding the Group's ability to continue to operate in 2025. The Group's future is particularly dependent on outstanding contingent considerations and the outcome of the negotiations on these.

Corporate governance report

Principles of Corporate Governance

Go North Group AB complies with Swedish law. This report is prepared in accordance with the Swedish Annual Accounts Act, RFR 1 Supplementary Accounting Rules for Groups, and International Financial Reporting Standards (IFRS) including interpretations from the IFRS Interpretations Committee (IFRS IC) as adopted by the EU. The company also follows Nasdaq regulations for companies with bonds listed on Nasdaq Stockholm. The Swedish Corporate Governance Code is not mandatory for the company and is therefore not applied.

Internal Control and Risk Management

The company's operations involve the sale of products via Amazon, Walmart, and its own website. The Board of Directors reviews management reporting and brand-specific reporting on a monthly basis.

Shareholders

The company's share capital amounts to SEK 500,000 and is owned by Go North Group Holding AB, which is in turn owned by three eEquity companies (32.98%), Hallenby Holding AB (25.21%), and 62 other shareholders (41.81%). There are no restrictions on shareholders' voting rights at the Annual General Meeting.

Authorizations

There are currently no authorizations granted to the Board to issue new shares or to repurchase own shares.

General Meeting, Board of Directors, Audit Committee, and Investment Committee

The highest decision-making body is the General Meeting of Shareholders. During the financial year, one Annual General Meeting was held. According to the Articles of Association, the Board shall consist of 3–5 members and up to 2 deputies, but during the year, the Board consisted of only 2 members. Plans exist to appoint additional members during 2025. The Board met twice during the year.

Audit

The company's auditors review the management conducted by the Board and CEO, as well as the quality of the company's accounting records, and report their findings to the shareholders through the audit report, which is presented at the Annual General Meeting. The auditor also participates in the board meeting where the annual financial statements are presented and reports on the audit of the company's results, financial position, and internal controls. Furthermore, the auditor may report observations directly to the Chairman of the Board if deemed necessary. The auditor is appointed by the Annual General Meeting, Öhrlings PricewaterhouseCoopers AB was re-elected, with Johan Rippe as the principal auditor, for the period until the 2025 Annual General Meeting takes place.

Articles of Association

The Articles of Association contain no provisions concerning the appointment or dismissal of Board members, or procedures for amendments to the Articles. Any changes to the Articles of Association are decided by the General Meeting of Shareholders.

Committees and Nomination Committee

The company has not established a Nomination Committee. This deviation from the Swedish Corporate Governance Code is justified by the limited shareholder base, which makes a separate nomination body unnecessary. The Chairman of the Board is responsible for nominating Board members. The company has not established a separate Remuneration Committee and has delegated remuneration matters to the entire Board. Regarding the Audit Committee, the company has chosen not to establish one, instead, the Board oversees the company's financial reporting, stays informed about the audit of the annual accounts, and monitors the auditors' independence and impartiality.

Go North Group AB

Payments, new issues and share contributions are specified in the consolidated statement of changes in equity

Go North Group AB 559252-2188

CONSOLIDATED NOTES

Note 1 General Information

These consolidated financial statements cover the parent company Go North Group AB, corporate identity number 559252-2188, and its subsidiaries. Go North Group is a parent company registered in Sw eden with its registrated office in Gothenburg with the adress Första Långgatan 28B, 413 27, Gothenburg, Sw eden.

The operations of the parent company and its subsidiaries included e-commerce via mainly the Amazon platform. The Board of Di approved these consolidated accounts for publication on June 30.

Unless otherwise stated, all amounts are reported in thousands of Sw edish kronor (KSEK). Information in brackets refers to the comparison period.

Note 2 Summary of significant accounting policies

This note contains a list of the significant accounting policies applied in the preparation of these consolidated financial statements. These policies have been applied consistently for all years presented. The consolidated financial statements include Go North Group AB and its subsidiaries.

Basis for the preparation of the reports

The consolidated accounts for the Go North Group have been prepared in accordance with the Sw edish Annual Accounts Act, RFR 1 Supplementary Accounting Rules for Groups, and International Financial Reporting Standards (IFRS) and interpretations from the IFRS Interpretations Committee (IFRS IC) as adopted by the EU.

The consolidated financial statements have been prepared on historical cost basis, except: certain financial assets and liabilities (including derivative instruments) measured at fair value.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to make certain judgements in the application of the Group's accounting policies. The areas involving a high degree of judgement, complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4.

New and amended standards not yet applied by the Group

Changes to IFRS in 2024 have not had a material impact on the Group's financial reports.

Furthermore, IFRS 18 – Presentation and Disclosures in Financial Statements will replace IAS 1 – Presentation of Financial Statements. Provided that IFRS 18 is adopted by the EU and the effective date proposed by the IASB remains unchanged, the standard will be applied from the financial year 2027.

IFRS 18 introduces new requirements for the presentation and disclosures in financial statements, with a particular focus on the income statement and disclosures related to management performance measures. The standard is not expected to have any financial impact on the company, as IFRS 18 focuses on presentation and disclosures in the financial statements.

Segment reporting

The CEO has been identified as the chief executive decision maker, for the reason that the CEO is primarily responsible for allocating resources and evaluating performance. The assessment of the Group's operative segments should be based on the financial information reported to the CEO. The financial information reported to the CEO, as a basis for allocating resources and assessing the Group's performance, relates to the Group as a whole. Since the chief executive decision-maker makes decisions on the allocation of resources and assesses performance based on the Group as a whole, the Group as a whole is deemed to constitute a segment.

Consolidated financial statement

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when it is exposed to or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through its control of the entity. Subsidiaries are included in the consolidated financial statements from the date that control is transferred to the Group. They are excluded in the consolidated financial statements from the date that control is transferred to the Group.

The acquisition method is used to account for the Group's business combinations.

Intra-group transactions, balance sheet items and unrealised gains and losses on transactions between group companies are eliminated. Intra-group losses may be an indication of impairment that must be recognised in the consolidated financial statements. The accounting policies of subsidiaries have been amended, where appropriate, to ensure consistent application of the Group's policies.

All subsidiaries are 100% ow ned by Go North Group AB.

Foreign currency conversion

Functional and reporting currency

Items included in the financial statements of the various entities in the Group are measured using the currency of the primary economic environment in which each entity operates (functional currency). The consolidated financial statements use the Sw edish Krona (SEK), which is the parent company's functional currency and the group's reporting currency.

Transactions and balance sheet items

Transactions in foreign currencies are translated into the functional currency at the exchange rates prevailing at the date of the transaction or at the date the items are revalued. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the exchange rate on the balance sheet date are recognised in the consolidated income statement.

Foreign exchange gains and losses relating to loans and cash and cash equivalents are recognised in the consolidated income statement as financial income or expense. All other foreign exchange gains and losses are recognised in other operating income/expenses in the consolidated income statement.

Goodwill and fair value adjustments arising on the acquisition of a foreign business are treated as assets and liabilities of that business and are translated at the exchange rate on the balance sheet date.

Revenue recognition

The Group's principles for recognising revenue from customer contracts are presented below .

Most sales within the Group are made via Amazon. Go North delivers finished goods to Amazon's main w arehouse, after w hich Amazon handles delivery, w arehousing and shipping to the end consumer. Amazon charges a sales fee for sales via the platform for this, and an FBA fee, w hich are classified as selling expenses in the financial statements. The Group does not recognise revenue on delivery to Amazon, since Amazon is not a customer of the Group.

Revenue is recognised when control of the goods or services sold is transferred to the customer. The basic principle is that the Group recognises revenue in the manner that best reflects the transfer of control over the promised goods or services to the customer. The Group's reporting uses a five-step process that is applied to all customer contracts:

1: Identify contracts with customers

A contract is created when the customer places an order on Amazon. At this point, payment terms can be determined and it is likely that compensation will be received. The contract always has a commercial meaning.

2: Identify the separate performance obligations

Go North does not handle the goods once they have been delivered to Amazon's main w arehouse but cannot account for the revenue until the goods have left Amazon's main w arehouse; only then does the risk pass from Go North to the end customer and it no longer has any obligations. Delivering the goods from Amazon's main w arehouse is the only performance obligation.

3: Determine the transaction price

The transaction price is stated in the order confirmation and on Amazon's website.

4: Assign the transaction price to each of the separate performance obligations. As there is only one performance obligation, the entire transaction price is allocated to this performance obligation.

5: Revenue is recognised as each performance obligation is satisfied All revenue is recognised when the goods leave Amazon's main w arehouse.

Using the above five-step model, it has been determined that the Group's performance obligation is primarily the sale of goods. Revenue includes the fair value of the amount received or receivable for goods and services sold in the Group's operative activities. Revenue is recognised net of value added tax and discounts and after eliminating intra-group sales.

Interest Income

Interest income is recognised using the effective interest method.

Current and deferred income tax

The tax expense for the period comprises current tax calculated on the taxable profit for the period at the applicable tax rates, adjusted for changes in deferred tax receivables and debts relating to temporary differences and unutilised tax losses.

The current tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the parent and its subsidiaries operate and generate taxable income. Management regularly evaluates the claims made in tax returns for situations where the applicable tax rules are subject to interpretation and assesses whether it is probable that a tax authority will recognise an uncertain tax treatment. The Group measures its recognised taxes based on the most likely amount or the expected value, depending on which method best predicts the outcome of the uncertainty.

Deferred tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred tax is also not recognised if it arises from a transaction that is the initial recognition of an asset or liability that is not a business combination and, at the time of the transaction, affects neither accounting nor taxable profit. Deferred income tax is calculated using tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Go North does not recognise deferred tax on tax losses as it is still too early and uncertain to determine whether they will be able to be offset against future profits.

Current and deferred tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In such cases, the tax is also recognised in other comprehensive income or equity.

Lease payments

Lease payments are apportioned between the amortisation of the liability and interest. Interest is recognised in the income statement over the lease term in a manner that results in a fixed rate of interest on the lease liability recognised in each period.

Right-of-use assets are measured at cost and include the follow ing:

- · the initial valuation of the lease liability;
- · and payments made on or before the date on which the leased asset is made available to the lessee

The right-of-use asset is amortised linearly over the shorter of the useful life of the asset and the lease term. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is amortised over the useful life of the underlying asset.

Lease payments under short-term leases and leases where the underlying asset has a low value are recognised as an expense on a straight-line basis over the lease term. Short-term leases are those with a lease term of 12 months or less. Leases for which the underlying asset has a low value essentially relate to IT equipment.

Intangible assets

Goodwill

Goodw ill arising on business combinations is included in intangible assets. Goodw ill is not amortised but is tested annually for impairment or more frequently if events or changes in circumstances indicate a potentially depreciated value. Goodw ill is recognised at cost less accumulated impairment losses. When an entity is sold, the carrying amount of goodw ill is included in the resulting profit/loss.

In the 2023 impairment test, all goodwill was impaired. The goodwill was attributable to the acquisition of Go North Rocket 36 AB which became a dormant company in 2023.

Brands, licences and customer contracts

Brands and licences acquired separately are recognised at cost. Brands, licences and customer contracts acquired in a business combination are recognised at fair value at the acquisition date.

The Group assesses that acquired brands have an indefinite useful life because they are expected to contribute indefinitely to cash flow and the associated costs to maintain these cashflows are part of normal sales & operating activities. They are recognised at fail value less impairment. In 2024, the impairment test of the brands was performed, resulting in an impairment of KSEK 252 159 in the Group and KSEK 169 111 in the Parent Company. The impairment is different for the Group and the Parent Company as the Parent Company writes down brands on an ongoing basis. The value of the Group's brands has been tested for impairment by calculating the value in use of each brand. In cases where the value in use was determined to be low er than the carrying amount, the carrying amount of the brand has been impaired. The total carrying amount of the company's brands was KSEK 302 889 in 2024 (KSEK 562 639 in 2023). The Group had no goodw ill recognised in 2023. The impairment test is described in more detail in Note 13.

Contingent consideration for brands that constitute a separate asset acquisition is included in the fair value of the brand at the time of acquisition based on Go North's best estimate of the future cost for settlement of the contingent consideration. Accordingly, the contingent consideration is recognised in Go North's balance sheet at fair value at the date of acquisition. Subsequent changes in the expected future cash flows of such a contingent consideration are adjusted against the acquired brand, which is Go North's choice of policy in relation to contingent consideration in asset acquisitions. For further information regarding the valuation and recognition of contingent consideration, see Notes 4 and 16.

Capitalised expenditure on development costs

Maintenance costs are expensed as incurred. Development costs that are directly attributable to development and controlled by the Group are recognised as intangible assets when the following criteria are met:

- The entity's intention is to complete the asset and to use or sell it;
- There are conditions to use or sell the asset;
- It can be show n how the asset will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use or
- sell the asset are available; and
- The expenditure attributable to the asset during its development can be measured reliably.

Directly attributable expenditure capitalised as part of the asset includes expenditure on employees and a reasonable proportion of indirect costs.

Capitalised development costs are recognised as intangible assets and are amortised from the time the asset is ready for use. Go North Group AB monitors ongoing projects on a quarterly basis together with cost owners to evaluate whether the projects are completed and whether future costs actually relate to maintenance.

Tangible fixed assets

Tangible fixed assets are stated at cost less depreciation. Cost includes expenditure directly attributable to the acquisition of the asset.

Depreciation is provided on a linear basis to allocate the cost of the asset, less its estimated residual value, over its estimated utilisation period. Utilisation periods are as follow s:

- IT equipment 5 years
- Equiptment, tools and fixtures 5 years
- Right-of-use assets 3 years

The residual values and useful period of assets are reviewed at the end of each reporting period and adjusted if necessary.

The carrying amount of an asset is written dow n immediately to its recoverable amount if the asset's carrying amount exceeds its estimated recoverable amount. Gains and losses on disposal are determined by comparing the sales proceeds with the carrying amount and are recognised in other operating income/expenses in the income statement.

Impairment of non-financial assets

Goodw ill and intangible assets with an indefinite useful period or intangible assets that are not ready for use are not amortised but are tested for impairment annually or whenever there is an indication of impairment. Assets that are subject to amortisation are assessed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. For the purpose of assessing impairment, assets are grouped at the low est levels for which there are largely independent cash flows (cash generating units). For assets (other than goodwill) that have been previously impaired, an assessment is made at each balance sheet date as to whether a reversal should be made. For further information on impairment testing and variables, see Note 13.

Financial instruments

The Group's financial assets and liabilities are summarised in note 16.

a) First reporting date

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Purchases and sales of financial assets and liabilities are recognised on trade date, the date on which the Group commits to purchase or sell the asset.

Financial instruments are initially recognised at fair value plus, for an asset or financial liability not carried at fair value through profit and loss, transaction costs directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs for financial assets and liabilities at fair value are recognised in the income statement.

b) Financial assets - Classification and measurement

The Group classifies and measures its financial assets in the amortised cost and fair value through profit or loss categories. The classification of investments in debt instruments depends on the Group's business model for managing financial assets and the contractual terms of the cash flows of the assets.

Financial assets measured at amortised cost

Assets held for the purpose of collecting contractual cash flow s, where those cash flow s are solely payments of principal and interest, are measured at amortised cost. The carrying amount of these assets is adjusted for any expected credit losses recognised. The Group's financial assets measured at amortised cost comprise other current receivables, accrued income and cash and cash equivalents.

c) Financial liabilities - Classification and measurement

The Group classifies and measures its financial liabilities in the amortised cost and fair value through profit and loss categories. Financial liabilities at fair value through profit and loss are classified as current liabilities if they are due within 12 months of the balance sheet date. If these mature later than 12 months from the balance sheet date, they are classified as non-current liabilities.

Financial liabilities measured at amortised cost

Subsequent to initial recognition, the Group's financial liabilities are measured at amortised cost using the effective interest method, with any difference between the proceeds (net of transaction costs) and the redemption value being recognised in the income statement over the period of the borrowings. Fees paid for borrowing facilities are recognised as transaction costs of the borrowing to the extent that it is probable that some or all of the facility will be draw n dow n. In such cases, the fee is recognised when the facility is draw n dow n. When there is no evidence that it is probable that part or all of the credit facility will be draw n dow n, the fee is recognised as a prepayment for financial services and is amortised over the life of the related loan commitment.

Financial liabilities measured at fair value consist of bond loans, liabilities to credit institutions, bank overdrafts, other non-current liabilities, trade payables and other current liabilities.

Financial liabilities measured at fair value through profit and loss

Conditional considerations arising from business combinations is recognised in the balance sheet on the trade date and measured at fair value, both initially and on subsequent remeasurement.

d) Derecognition of financial assets and financial liabilities

Financial assets are derecognised from the statement of financial position when the right to receive cash flows from the instrumenthas expired or been transferred and the Group has transferred substantially all the risks and rewards of ow nership.

When the terms of a financial liability are renegotiated, and not derecognised, a gain or loss is recognised in the income statement. The gain or loss is calculated as the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate. The gain or loss is calculated as the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate.

The change in value/cancellation of the contingent considerations is recognised against brands. For further information on this, see Notes 4 and 16.

e) Impairment of financial assets

Assets carried at accrued cost

The Group assesses the future expected credit losses associated with assets carried at accrued cost. The Group does not recognise an allow ance for credit losses as the receivables are with a major customer and ongoing assessments have indicated that such a reserve is not necessary. During Go North's active years, no credit loss has ever occurred.

Inventories

Inventories are recognised at the low er of cost and net realisable value. The cost of merchandise is determined after deducting discounts. The cost of goods for resale is determined after deducting discounts. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

All subsidiaries in the group have a booked obsolescence reserve that varies betw een 2% and 3% depending on the type of product sold by the subsidiary. The majority of subsidiaries sell products that do not have an expiry date. These companies' obsolescence reserves are at the low er end of the range. Subsidiaries with products that have an expiry date are at the higher end of the range. The outgoing obsolescence reserve amounts to KSEK 1,775.

Cash and cash equivalents

Cash and cash equivalents include, in both the balance sheet and the cash flow statement, bank balances. Bank overdrafts are recognised in the balance sheet as loans payable in current liabilities.

Share capital

Transaction costs directly attributable to the issue of new shares or options are recognised, net of tax, in equity as a deduction from the proceeds.

Trade payables

Trade payables are obligations to pay for goods or services acquired in the ordinary course of business from suppliers. The amounts are unsecured and are usually paid within 60 days. Trade and other payables are classified as current liabilities if they are due within one year or less (or within the normal operating cycle if longer). If not, they are recognised as non-current liabilities. Liabilities are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

Borrowings

Borrow ings are initially recognised at fair value, net of transaction costs. Borrow ings are subsequently stated at amortised cost and any difference betw een the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrow ings using the effective interest method. Fees paid for borrow ing facilities are recognised as transaction costs of the borrow ing to the extent that it is probable that some or all of the facility will be draw n dow n. In such cases, the fee is recognised when the facility is draw n dow n. When there is no evidence that it is probable that part or all of the credit facility will be draw n dow n, the fee is recognised as a prepayment for financial services and is amortised over the life of the related loan commitment.

Borrow ings are derecognised when the obligations are settled, cancelled or otherwise extinguished. The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Borrow ings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

Employee benefits

Short-term employee benefits

Liabilities for salaries and benefits, including non-monetary benefits and compensated absences, that are expected to be settled within 12 months after the end of the financial year are recognised as current liabilities at the undiscounted amount expected to be paid when the liabilities are settled. The cost is recognised in the statement of comprehensive income as the services are rendered by the employees. The liability is recognised as an employee benefit obligation in the consolidated balance sheet.

Pension obligations

The Group has defined contribution pension plans.

For defined contribution plans, the Group pays contributions to publicly or privately administered pension schemes on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the fees are paid. The fees are recognised as personnel costs when they fall due. Prepaid contributions are recognised as an asset to the extent that cash refunds or reductions in future payments are available to the Group.

Cash flow analysis

The cash flow analysis is prepared using the indirect method. The reported cash flow only includes transactions that have resulted in receipts or payments.

Note 3 Financial risk management

Financial risk factors

The Group's activities expose it to a variety of financial risks such as: various market risks, credit risk, liquidity risk and refinancing risk. The Group seeks to minimise potential adverse effects on its financial performance. The objective of the Group's financial activities is to: - ensure that the Group can fulfil its payment obligations;

- manage financial risks:
- ensure access to the necessary financing; and

- optimise the Group's net financial income

The Group's risk management is carried out by a centralised treasury department that identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board of Directors is involved in risk management in general and regularly review s operational risk management and policies in specific areas such as foreign exchange risk, interest rate risk, credit risk, liquidity risk, refinancing risk and the use of derivative and non derivative financial instruments and the investment of excess liquidity.

Market risk

Currency risk

The Group is exposed to foreign exchange risk arising from various currency exposures, mainly in respect of liabilities, in US dollars (USD) and SEK. The Group is exposed to significant currency risk due to the fact that the majority of liabilities are in SEK while approximately 99% of revenues are generated in USD, EUR and GBP. This means that exchange rate fluctuations can affect the Group's ability to pay interest and amortise debt and have a significant impact on the income statement and balance sheet. In the Group, currency risk also arises from purchases and sales in a currency that does not correspond to the functional currency of the company (transaction exposure). Transaction exposure is small as the majority of both revenues and expenses are in USD. The company currently has no foreign subsidiaries.

			2024-12-31	2	023-12-31	
Exposure (KSEK)	EUR	GBP	USD	EUR	USD	
Receivables Amazon	2 011	1 546	28 728	1 812	32 253	
Liabilities to credit institutions	-	-	53 313	-	45 417	
Bonds and Notes	-	-	373 083	-	179 805	
Brand acquisition liabilities	-	-	69 387	6 421	85 830	

Sensitivity analysis - currency risk

If the Sw edish Krona had a 10% low er/higher exchange rate in relation to EUR and USD, with all other variables constant, the impact on the Group's result would be equivalent to +/- KSEK 42 514 (2023: +/- KSEK 29 152), mainly caused by exchange rate effects on the Group's receivables and liabilities.

Interest rate risk

Liabilities to credit institutions consist of loans denominated in USD that bear interest at floating rates and expose the Group to cash flow interest rate risk. The Group does not hedge its interest rate risk on future cash flow s.

Sensitivity analysis - interest rate risk

If interest rates on borrowings at 31 December 2023 had been +/- 1% higher/low er with all other variables held constant, the estimated profit after tax for the financial year would have been SEK 5,687,000 (31 December 2022: SEK 2,708,000) low er/higher, mainly as an effect of higher/low er interest expenses for borrowings with variable interest rates. The calculation is based on the assumption that the Group had held the interest-bearing liabilities throughout the year.

Credit risk

Credit risk arises from balances with banks and credit institutions and customer credit exposures including outstanding receivables. Credit risk is managed at Group level. Only banks and credit institutions with a minimum credit rating of 'A' by an independent rating agency are accepted. All customers pay Amazon in advance, which means that the Group only has a maximum of 14 days for settlement with Amazon. Settlement with Amazon is considered to be of low risk.

No credit limits were exceeded during the reporting period and management does not expect any losses due to non-payment by counter parties. The Group's estimate of expected credit losses on trade receivables amounts to immaterial amounts and therefore no adjustment has been made in the financial statements.

Liquidity risk

The Group endeavors to manage its liquidity carefully to ensure sufficient funds for ongoing operating expenses. Management continuously monitors forecasts of the Group's liquidity reserve (including unutilised credit facilities) and cash assets based on expected cash flow s.

During September 2024, the parent company filed for reconstruction and began negotiations with creditors regarding, among other debts, how to manage the large bond debt and related interest payments. During 2025 the Group has been in a tight liquidity situation, needing to purchase inventory to prepare for key sales periods during the summer, fall and Christmas seasons, as well as pay for legal fees related to the reconstruction.

The Group's future liquidity situation is dependent on the negotiated w rite-down of a significant portion of debt in the parent company as part of the reconstruction to ensure that it can continue as a Group to pay its operational expenses. To summarise, the group's liquidity risk w as very high at the end of 2024 and is expected to remain so in 2025 at least until the completion of the reconstruction.

Refinancing risk

Refinancing risk is defined as the risk that difficulties arise in refinancing the Group, that financing cannot be obtained, or that it can only be obtained at increased costs. The risk is mitigated by the Group continuously evaluating different financing solutions.

The table below analyses the Group's financial liabilities broken dow n by the time remaining at the balance sheet date until the contractual maturity date. The amounts show n in the table are the contractual undiscounted cash flows. Future cash flows denominated in foreign currencies have been calculated using the exchange rate prevailing at the balance sheet date. For lease liabilities, expected interest payments have also been included based on

the latest interest rate before the balance sheet date. Trade payables and other current and non-current liabilities are generally interest-free. For bond loans, interest has not been included as the loan is considered to have already matured. Interest has also not been included for liabilities to credit institutions.

As a large proportion of the Group's debt was short-term at the end of 2024 and there was considerable uncertainty regarding the possibility of renegotiating or refinancing it, the Group is considered to have very high refinancing risk. Continued difficult investor climate together with high debt burden and liquidity risk means that this risk is expected to remain very high in 2025.

		В	etween 1

Calculation and disclosure of fair value

The table below shows financial instruments measured at fair value, based on the classification in the fair value hierarchy. The different levels are defined as follows:

(a) Level 1 financial instruments

Quoted prices (unadjusted) in active markets for identical assets or liabilities.

(b) Level 2 financial instruments

Observable data for the asset or liability other than quoted prices included in Level 1, either directly (i.e. as price quotations) or indirectly (i.e. derived from price quotations).

(c) Level 3 financial instruments

Where one or more significant inputs are not based on observable market data.

The follow ing table shows the Group's financial liabilities and assets at fair value as of December 31 2024:

KSEK	Level 1	Level 2	Level 3	Total
Financial liabilities				
Contingent considerations			69 387	69 387
Total financial liabilities	-	-	69 387	69 387

Specific valuation techniques used to value financial instruments include:

- Contingent consideration - expected cash flows are estimated based on the terms of the purchase agreement and the entity's knowledge of the business

and how the current economic environment is likely to affect it.

There have been no transfers between levels during the year.

Level 3 fair value measurement inputs and valuation process

Contingent consideration: The fair value of the contingent consideration arrangement is based on management's judgement of w hat is likely to be paid given the terms of the share purchase agreement. The management has made the judgement that 100% of the stated amount will be paid.

Management of capital

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can continue to generate returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to minimise the cost of capital.

In order to maintain or adjust the capital structure, the group may change the dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

he Group assesses its capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as interest bearing liabilities (comprising the items Long-term bonds, Long-term liabilities to credit institutions, Short-term bonds and Short-term liabilities to credit institutions) less cash and cash equivalents. Total capital is calculated as equity in the consolidated balance sheet plus net debt. The gearing ratio at each balance sheet date w as as follow s:

	2024-12-31	2023-12-31
Interest-bearing liabilities	770 370	568 686
Less: cash and cash equivalents	90 329	14 742
Net debt	680 041	553 944
Total equity capital	-367 594	17 236
Total capital	312 447	571 180
Debt ratio	218%	97%

The increase in the gearing ratio during December 31 2023 - December 31 2024 was mainly caused by bond issues combined with low er equity.

Note 4 Significant estimates and judgements for accounting purposes

This note contains a list of the significant accounting policies applied in the preparation of these consolidated financial statements. These principles have been applied consistently for all years presented. The consolidated financial statements include Go North Group AB and its subsidiaries. In addition to the assessment presented below, there are significant financial risks described in the Management Report.

Brands

The Group considers that all identified brands have an indefinite useful life and are therefore not amortised but instead tested annually for impairment. Intangible assets with indefinite useful lives are tested for impairment annually by the Group in accordance with the accounting policy described in Notes 2 and 13. The recoverable amount of cash-generating units (CGUs) has been determined by measuring value in use. The impairment test includes a number of assumptions that, according to various judgements, may have a significant impact on the calculation of recoverable amounts such as: operating margin/profit, discount rate, grow th/inflation. Significant assumptions used in impairment testing and a description of the effect of reasonable possible changes in those assumptions on which the calculations are based are disclosed in the notes to the financial statements.

Note 5 Segment information and disclosure of net sales

The Group's chief executive decision maker is the CEO, who uses the Group as a whole to asses the performance of the operating segments.

Go North Group AB has obtained the information on sales by geographical marketplace from Amazon.

Revenue from external customers broken down by country, based on the geographical marketplace from which the sale is made:	2024-01-01 2024-12-31	2023-01-01 2023-12-31

Unutilised tax losses for which no deferred tax asset has been recognised amount to KSEK 281 930 for 2023. The deficit for 2024 has not yet been calculated but has no effect on the accounts as the Group does not capitalise the losses.

Note 11 Investments in subsidiaries

Im pairment testing

The value of the Group's trademarks has been tested for impairment by calculating the value in use of each trademark. In cases where the value in use w as determined to be low er than the carrying amount, the carrying amount of the trademark has been impaired. The total carrying amount of the company's trademarks was KSEK 302 889 in 2024 (KSEK 562 639 in 2024). The Group had no goodwill recognised in 2024.

The value in use for each brand has been calculated using a discounted cash flow valuation (after tax). This has been based on the expected cash flow effects of the brand if it was operated within the group until the end of 2027 together with a end value of the brand at the end of 2027 based on Gorden's perpetual grow th model. Key assumptions for these calculations are the discount rate (which should correspond to the market WACC for eretailers with main sales in the US), the expected sales and gross profit (i.e. the brand's contribution margin after variable costs) of the brand until the end of 2027, the expected overheads that the brand will help to cover, the expected investments made that affect cash flow that the brand will help to cover and the perpetual grow th rate assumed after 2027.

The discount rate used in the calculations is 12.94% and the perpetual grow th rate after 2027 assumed is 2%. Management considers these assumptions to be realistic and in line with industry standards. Revenue and expenditure forecasts for the brand and the group are based on forecasts adopted by management for each brand in the context of setting the budget. These forecasts are based on management's experience, historical data and future plans for the brands. Management believes that these brand-specific forecasts have a high degree of uncertainty and are the main potential source of error in the valuations. How ever, a sensitivity analysis where the discount rate is increased by 3% and the value of the brands is subsequently reduced by a further 30% still results in a higher total valuation for the Group's brands than the reported values. This is because impairment tests are conducted at the individual level and only identified decreases in value are reported. Management therefore concludes that no reasonable changes in the key assumptions would lead to a significant decrease in the estimated value in use at an aggregate level.

Note 15 Inventories

The value of the Group's inventory at December 31, 2024 is KSEK 91 914 (December 31, 2023 is KSEK 95 703). Cost of goods sold is included in the item Cost of goods sold in the income statement and amounts to KSEK -153 286 (KSEK-177 641). Inventories consists of finished goods.

Valuation of inventories

The Group recognises inventories of KSEK 91 914 (KSEK 95 703). All subsidiaries in the Group have booked obsolescence reserve that varies betw een 2% and 3% depending on the type of product sold by the subsidiary. The majority of subsidiaries sell products that do not have an expiry date, these companies' obsolescence reserve are at the low er end of the range. Subsidiaries with products that have an expiry date are at the higher end of the range. The outgoing obsolescence reserve amounts to KSEK 1,775. For the accounting principle applied to inventory valuation, refer to Note 2.

Financial liabilities at fair value through profit or loss

Level 3 includes liabilities relating to contingent considerations, for which fair value has been calculated in cases where the timing of the outcome can be determined with certainty and the effect is significant for the Group. The calculation is made by valuing the contingent consideration at the time of acquisition at the historical probability that a contingent consideration will be paid. In all cases, the contingent consideration is based on future sales or profits.

Go North Group AB monitors the performance of the brand on a quarterly basis and adjusts the contingent consideration based on the valuation model established by management. Some form of over/underperformance is required for the contingent consideration to be adjusted.

Contingent considerations (level 3)	
Opening value	92 251

Total	769 796	568 686

The Group has issued bonds consisting of Senior Bonds and Super Senior Bonds. The Senior Bonds comprise one tranche with a nominal value of TSEK 302,021 and another tranche with a nominal value of TUSD 4,620. The Super Senior Bonds have a nominal value of TUSD 26,180. The Group has also issued Backstop Fee Bonds with a nominal value of TSEK 15,000.

The bonds are listed on the Nasdaq stock exchange in Stockholm. The bonds have different maturities ranging from 2026 to 2028. The SEK tranche carries an interest rate of STIBOR 3 months +11% per year, while the USD tranche carries an interest rate of SOFR 3 months +11% per year.

According to the bond terms, certain financial covenants must be met, such as the Group maintaining a minimum cash balance of TSEK 30,000 at the end of each month. Additionally, the inventory value must be less than TSEK 135,000. During the year, the Group failed to meet these covenants, and as a result of IAS 1, paragraph 69, the bonds have been reclassified as a short-term liability.

During the year, the Group amended its Revolving Credit Facility to a nominal value of TUSD 4,503, with an interest rate of SOFR 3 months +6.26% per year. The Group has fully utilized the facility during the year.

The reported value of the pledged financial and non-financial assets is stated in Note 27.

All liabilities mature within 1-2 years.

Note 31 Events after the end of the reporting period

Go North Group AB has applied for an extension of the reconstruction deadline, which expired in mid-June.Go North's negotiations with creditors in the reconstruction process are ongoing.

Equity was restored in two out of four subsidiaries which had previously established balance sheets for liquidation during 2024. The Board took a decision in February 2025 to liquidate the other two subsidiaries, as they have no active business.

Go North made further internal reorganizations during 2025 and as part of that process outsourced its finance function in Sweden.

PARENT COMPANY NOTES

Note 32 Parent company accounting policies

The significant accounting policies applied in the preparation of these financial statements are set out below. These principles have been applied consistently for all years presented, unless otherw ise stated.

The annual accounts for the parent company have been prepared in accordance with RFR 2 Accounting for Legal Entities and the Sw edish Annual Accounts Act. In cases where the Parent Company applies accounting principles other than the Group's accounting principles, which are described in Note 2 to the consolidated accounts, these are stated below.

The annual accounts have been prepared on the historical cost basis.

The preparation of financial statements in conformity with RFR 2 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the parent's accounting policies. The areas involving a higher degree of judgement, complexity or areas where assumptions and estimates are significant to the financial statements are disclosed in note 5 to the consolidated financial statements.

The Parent Company is exposed to a variety of financial risks through its activities: market risk (currency risk and interest rate risk), credit risk and liquidity risk. The Parent Company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. For more information on financial risks, see note 3 to the consolidated financial statements.

The Parent Company applies different accounting policies from the Group in the cases set out below :

.

Forms of presentation

The income statement and balance sheet follow the format of the Annual Accounts Act. The statement of changes in equity follow s the Group's format but must contain the columns specified in the Annual Accounts Act. Furthermore, there are differences in labelling, compared to the consolidated financial statements, mainly regarding financial income and expenses and equity.

Financial instruments

IFRS 9 is not applied in the Parent Company. The Parent Company instead applies the points stated in RFR 2 (IFRS 9 Financial Instruments, p. 3-10)

Financial instruments are measured on a historical cost basis. In subsequent periods, financial assets acquired with the intention of being held for the short term will be recognised in accordance with the low est value principle at the low er of cost and market value. Derivative instruments with a negative fair value are recognised at this value.

When calculating the net realisable value of receivables recognised as current assets, the impairment testing and loss allow ance principles in IFRS 9 shall be applied. For a receivable recognised at amortised cost at group level, this means that the loss risk allow ance recognised in the group in accordance with IFRS 9 shall also be recognised in the parent entity.

Leased assets

The Parent Company has chosen not to apply IFRS 16 Leases, but has instead chosen to apply RFR 2 IFRS 16 Leases p. 2-12. This choice means that no right-of-use asset and lease liability are recognised in the balance sheet, but the lease payments are recognised as an expense on a straight-line basis over the lease term.

Brands

Brands are amortised over five years and tested for impairment at least annually.

Note 33 Net sales

The Parent Company has recognised the follow ing amounts in the income statement relating to revenue:

Income	2024-01-01 2024-12-31	2023-01-01 2023-12-31
Other internal income	55 420	97 351
Other income	129	210
Total income	55 549	97 561
Net sales by geographical market	2024-01-01 2024-12-31	2023-01-01 2023-12-31
Sw eden USA	55 549 -	97 561
Total	55 549	97 561

The Parent Company's income relates to management fees paid to the subsidiaries. The transaction is carried out on an arm's length basis and follow s the Group's transfer pricing policy.

Note 34 Remuneration of auditors

	2024-01-01	2023-01-01

Note 40 Taxes on profit/loss for the year

Current tax	2024-01-01 2024-12-31	2023-01-01 2023-12-31
Current taxes on profit/loss for the year	-	-
Adjustments relating to previous years	-	-
Total current tax	-	-

The income tax on the Group's profit before tax differs from the theoretical amount that would have resulted from applying the Sw edish tax rate to the results of the consolidated companies as follow s:

Recognised tax	2024-01-01 2024-12-31	2023-01-01 2023-12-31
Profit/loss before tax	-349 195	-281 780
Income tax calculated according to tax rate in Sw eden 20.6%	71 934	58 047
Tax effect of:		
Non-taxable income	-	-
Non-deductible expense	-18	-81
Unrecognosed temporary diffrences, loss carry-forw ards	71 952	58 128
Total recognised tax	-	-

Unutilised tax losses for which no deferred tax assets has been recognised amount to KSEK 257 258 for 2023. The deficit for 2024 has not yet been calculated but has no effect on the accounts as the Go North Group does not capitalise the losses.

Total short-term	714 549	63
Total borrowings	769 796	45 597

The Group has issued bonds consisting of Senior Bonds and Super Senior Bonds. The Senior Bonds comprise one tranche with a nominal value of TJSEX 302,021 and another tranche with a nominal value of TJSD 4,620. The Super Senior Bonds have a nominal value of TJSD 26,180. The Group has also issued Backstop Fee Bonds with a nominal value of TSEX 15,000.

The bonds are listed on the Nasdaq stock exchange in Stockholm. The bonds have different maturities ranging from 2026 to 2028. The SEK tranche carries an interest rate of STIBOR 3 months +11% per year, while the USD tranche carries an interest rate of SOFR 3 months +11% per year.

According to the bond terms, certain financial covenants must be met, such as the Group maintaining a minimum cash balance of TSEK 30,000 at the end of each month. Additionally, the inventory value must be less than TSEK 135,000. During the year, the Group failed to meet these covenants, and as a result of IAS 1, paragraph 69, the bonds have been reclassified as a short-term liability.

During the year, the Group amended its Revolving Credit Facility to a nominal value of TUSD 4,503, with an interest rate of SOFR 3 months +6.26% per year. The Group has fully utilized the facility during the year.

The carrying amount of the pledged financial and non-financial assets is disclosed in note 27.

All long-term liabilities mature within 1-2 years.

Note 50 Transactions with related parties

Go North Group AB owns 100% of the parent company's shares and has a controlling influence over the Group. Related parties are all subsidiaries within the Group and senior executives of the Group and their related parties. Transactions are conducted at arm's length where applicable.

The following transactions have taken place with related parties:

(a) Sales of goods and services	2024-12-31	2023-12-31
Management fees	55 420	97 351
Total	55 420	97 351
(b) Purchases of goods and services	2024-12-31	2023-12-31
License fees	2 925	2 925
Total	2 925	2 925

Receivables and payables at year-end arising from sales and purchases of goods and services

	2024-12-31	2023-12-31
Claims on related parties:		
Management fees	55 420	97 351
Internal transfers	106 912	56 863
Total	162 332	154 214

The Group does not have any provisions for doubtful debts attributable to related parties. The Group has also not recognised any expenses relating to doubtful receivables from related parties during the period. No collateral is pledged for the receivables.

Receivables from related parties mainly arise from sales transactions and are due 2 months after the date of sale.

Note 51 Events after the end of the reporting period

Significant events after the end of the financial period

Go North Group AB has applied for an extension of the reconstruction deadlin, which expired in mid-June. Go North's negotiations with creditors in the reconstruction process are ongoing.

Equity was restored in two out of four subsidiaries which had previously established balance sheets for liquidation during 2024. The Board took a decision in February 2025 to liquidate the other two subsidiaries, as they have no active business.

Go North made further internal reorganizations during 2025 and as part of that process outsourced its finance function in Sw eden.

The consolidated income statment and balance sheet will be submitted to the Annual General Meeting on June 30, 2025 for adoption.

The Board of Directors and the CEO certify that the consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU and give a true and fair view of the Group's financial position and results. The annual accounts have been prepared in accordance with generally accepted accounting principles and give a true and fair view of the financial position and performance of the parent company.

The management report for the Group and the Parent company gives a true and fair view of development of the Group's and the Parent Company's business, financial position and results of operations and describes the significant risks and uncertainties faced by the Parent Company and the companies included in the Group.
