

## Revenio Group Corporation: iCare and Thirona are joining forces in AI solutions

Revenio Group Corporation, Press release, April 27, 2022 at 3.05 p.m. (EEST)

### iCare and Thirona are joining forces in AI solutions

iCare and Dutch Thirona launch a partnership with iCare to distribute Thirona 's Artificial Intelligence in Europe.

Thirona is one of the leading and highly respected companies specializing in artificial intelligence for medical image analysis.

"This is an exciting opportunity to contribute to keeping the wonderful world visible for all. Together with Thirona, we are implementing a top-performance screening solution based on fundus images. We start by screening diabetic retinopathy from diabetics and bring to market an integrated service that is fast and easy to use thanks to automation. High-quality images from the iCare DRSpplus fundus imaging system provide a good foundation for the solution" says **Pirjo Kortteisto**, Business Development Manager of Icare Finland.

"By joining forces with iCare we can bring innovation to the mainstream markets faster. iCare is not just a distribution channel for us. Partnerships based on a shared vision and mutual trust are very centric to Thirona's strategy, so we are happy to have iCare as our strategic partner", says **Diederik Sakkers**, Business development manager RetCAD at Thirona.

---

In 2021, the Group's net sales totaled EUR 78.8 million, with an operating profit of EUR 22.1 million. Revenio Group Corporation is listed on Nasdaq Helsinki with the trading code REG1V.

## **Thirona in brief**

Thirona is an innovative company specializing in artificial intelligence for medical image analysis that allow for precise quantification of disease symptoms and contribute to personalized patient treatment. Thirona partners with research institutions and medical companies in their innovation trajectories aimed to enable breakthroughs in treatment development and clinical care. Founded in 2014 by female scientist Eva van Rikxoort, the company develops highly innovative deep learning solutions for lung and retinal image analysis. Rooted in science and providing reliable and user-friendly solutions, it bridges the gap between academic ideas and clinical use. Since inception in 2014, Thirona has become an important player in the medical imaging field.

RetCAD™, one of Thirona's brands, is a MDR class IIa certified software using artificial intelligence that analyses color fundus images for the presence of eye diseases. It assists eye care providers in early diagnosis and grading of the vision threatening diseases. RetCAD™ uses state-of-the-art deep learning and computer vision technology, utilizing large amounts of human-specialist graded images, to provide quantified clinical outcome measures.
