

Maven Wireless granted a fourth patent in South Korea

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted one new patent in South Korea for the patent application "Carrier Aggregation"

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique, future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary technology.

Including the new granted patent, Maven Wireless possesses 68 patents worldwide and has additionally 11 patent applications pending. The new patent in South Korea covers a method performed by a digital DAS for routing aggregated carriers received by at least one digital master unit of the DAS to at least one digital remote unit of the DAS.

This patent supports and protects Maven Wireless' business especially in the APAC region.
