

## Medtech Leaders and Clinical Expert Call for MDR Reform in Dagens Industri

**In a debate article published in Dagens Industri, four medtech CEOs, including Neola Medical's CEO Hanna Sjöström, together with a professor at Lund University and senior clinician at Skåne University Hospital, highlight how the EU MDR framework is slowing innovation and driving investment away from Europe.**

As MDR is currently under review, the authors outline concrete steps to restore a more innovation-enabling regulatory pathway while maintaining high standards of patient safety.

The debate article in Dagens Industri is available to read (in Swedish) here: <https://www.di.se/debatt/regelbordan-kvaver-svensk-medtech/>

### **About Neola Medical**

Neola Medical AB (publ) develops an innovative medical technology device for non-invasive, continuous lung monitoring and real-time alerts of potentially life-threatening lung complications in preterm born babies. By enabling instant detection, the technology aims to support earlier intervention, improve clinical decision-making, enhance long-term outcomes, and ultimately contribute to saving lives. The patented, cutting-edge technology was developed at Lund University in Sweden and is based on a spectroscopic method that measures changes in lung volume and oxygen gas concentration. Neola Medical builds on Sweden's longstanding legacy of medical technology innovation and contributions to global health care. Neola Medical was founded in 2016 and is listed on NASDAQ First North Growth Market (ticker: NEOLA). Read more at [www.neolamedical.com](http://www.neolamedical.com). The company's Certified Adviser is FNCA Sweden AB.
