About JonDeTech

JonDeTech is a Swedish high-tech company developing digital and analogue heat sensors for measuring Core Body Temperature (CBT). The Company's patented sensor technology combines a very small form factor with high accuracy and low power consumption, enabling integration into high-volume products such as wearables, medical sensors and other consumer products. The technology is designed to enable continuous body temperature monitoring in mass-produced consumer products, representing the next major technological step in digital health and wearables as body temperature data becomes as established as heart rate monitoring. JonDeTech operates through a global network of distributors and partners, with the objective of supplying sensors to leading global players in consumer electronics and digital health.

JonDeTech's share is listed on NGM Growth Market.
