

Arcario's K33 Announces Expansion of Trading Capabilities with SEK and DKK

Arcario, the Scandinavian powerhouse in digital assets and web3 technologies, is thrilled to announce an exciting development in K33, one of its key portfolio companies, with the full integration of trading capabilities in SEK and DKK.

K33 Markets has been making waves in the digital asset brokerage landscape since its launch in early October 2023. In a recent advancement, K33 Markets has now integrated the ability to trade in Swedish Krona (SEK) and Danish Krone (DKK), adding to the platform's already diverse currency portfolio. Clients can now trade more efficiently by specifying the desired trade amount in any currency of choice.

Since its inception, K33 Markets has been committed to providing a seamless and efficient trading experience, and this latest update is a testament to that commitment. FX flexibility is a core part of K33's offering, giving clients the ability to deposit, trade against, and withdraw in a range of fiat currencies including NOK, USD, EUR, GBP, CHF, DKK, and SEK. This eliminates the friction of costly currency conversion fees and heightens the user experience.

"The launch of K33 Markets has exceeded our expectations, and the feedback from our current client base shows that we are bringing a much-needed product to the market, especially in the Nordics," said Torbjørn Bull Jenssen, CEO of K33.

Interested clients are encouraged to explore the enhanced features of K33 Markets. Registrations are currently open, and more information can be found <u>here</u>.

###
