

OPTICEPT TECHNOLOGIES ENTERS AGREEMENT WITH A JUICE PRODUCER IN CENTRAL EUROPE

OptiCept Technologies has today entered into an agreement with a leading juice producer in Central Europe. The goal is to verify that the CEPT platform can improve the shelf-life of the customer's juice products.

OptiCept has signed an initial agreement with a leading producer of juices and other drinks. A juiceCEPT+ ODIN will be used during the project. Lab tests with good results are completed, and now the customer is taking the next step to verify the technology in their own production. The goal is to achieve an extended shelf life for cold-pressed vegetable juice. The verification will be carried out in autumn 2023. The customer pays 7000 euros. The potential of this production facility is up to 6 juiceCEPT+ BALDER. Discussions are also held regarding increased extraction with juiceCEPT BALDER.

"We look forward to starting another reference project, this time for the juiceCEPT+ application with a focus on extended shelf-life and quality. The agreement is in line with our new strategic focus where we want to develop our technology with partners. There is great potential as the customer is a leader in the juice segment in their region and vegetable juice is a popular product in Central Europe. A first step in a long-term collaboration and an exciting entry into a new large market with a good reference customer". Says Thomas Lundqvist, CEO, OptiCept Technologies.

About Us

OptiCept Technologies AB (publ) provides the food and plant industry with technological solutions that contribute to a more sustainable world and enable climate-smart economic growth. OptiCept optimizes biological processes - Increased extraction from raw material, extended shelf life, reduced waste, and improved quality (taste, aroma, color, nutritional content) of the final product.

The positive effects of technology increase efficiency for our customers, better products for the consumers, and minimal impact on our environment. Through patented technology in PEF (pulsed electric field) and VI (Vacuum Infusion), the technology opens up new business opportunities for the food and plant industry worldwide. OptiCept's vision is to contribute to a sustainable world by offering efficient green cutting-edge technology that is easy to use in the areas of FoodTech and PlantTech.

The company is located in Lund and the share is traded on the Nasdaq First North Growth Market. Erik Penser Bank is a Certified Adviser and is available at 08-463 80 00 or certifiedadviser@penser.se.
