SALTX RECEIVES ORDER FROM HOLCIM FOR NEXT-PHASE DEVELOPMENT PROGRAM FOR ELECTRIFIED CLINKER PRODUCTION

PRESS RELEASE 03 November 2026 10:00:00 CET

Following successful clinker production results in April this year, SaltX and Holcim continue to support the electric sintering program using SaltX ECR technology. Holcim has placed an order for an expanded development program focused on further process development and in-depth validation of the material for use in cement and concrete production.

The program will include additional material testing and optimization of the technology and processes. Holcim will then deliver the clinker for grinding and further evaluation for use in cement and concrete production. The program supports the continued work toward a joint demonstration plant for electrified clinker production.

While the order is strategically important to the continued development of SaltX technology, its financial contribution is expected to be limited.

Lina Jorheden, CEO of SaltX:
“The results achieved to date, together with Holcim, demonstrate the potential of our technology for electrified clinker production. This order accelerates the material testing and application development phases of the parties' broader strategic collaboration.”

The extended program for electrified cement clinker production using SaltX ECR technology is part of the companies’ collaboration toward a fully electrified pilot plant in Europe.

About SaltX Technology
SaltX is a Swedish greentech company that develops and markets sustainable technologies that create value for customers, the climate, and society. The company operates within electrification of emission-intensive industries such as the lime and cement industries. SaltX Technology’s share is listed on Nasdaq First North Premier Growth Market, with FNCA Sweden AB as Certified Adviser. For more information, visit **www.saltxtechnology.com.**

About Holcim
Holcim (SIX: HOLN) Holcim (SIX: HOLN) has the vision to be the leading partner for sustainable construction, with net sales of CHF 15.7 billion in 2025. The company creates value across the built
environment, from infrastructure and industry to buildings.
Headquartered in Zug, Switzerland, Holcim employs more than 45,000 people
across 43 markets in Europe, Latin America, and Asia, the Middle East and Africa, and has been recognized as a Global Top Employer by the Top Employers Institute.
Holcim offers integrated, value-adding solutions across building materials and
construction, from foundations and flooring to walls and roofing, powered by
premium brands such as ECOPact, ECOPlanet, ECOCycle and Ytong. For more
information, visit **www.holcim.com**.
