## Gränges among Europe's Climate Leaders 2025 – for the third year

Gränges has once again been named one of Europe's Climate Leaders by the Financial Times and Statista, earning this prestigious recognition for the third consecutive year. The annual ranking identifies European companies that have significantly reduced their greenhouse gas emissions and provided transparency in their sustainability reporting.

To qualify, companies must demonstrate independent emissions reporting and meet stringent criteria, including transparency, net-zero commitments, and measurable emissions reductions from their own operations (scope 1 and 2). This recognition underscores Gränges' ongoing commitment to sustainable development and its ambitious climate targets.

"Being recognized as a Climate Leader once again shows that our efforts to cut emissions and stay transparent are paying off. It strengthens trust in Gränges among customers and stakeholders and encourages us to continue driving meaningful change toward a more sustainable aluminium industry," said Sofia Hedevåg, SVP Sustainability at Gränges.

Gränges remains committed to its sustainability plan, focusing on creating circular and sustainable aluminium solutions and supporting customers in their sustainability and decarbonization efforts.

The full ranking of *Europe's Climate Leaders 2025* is available on the [Financial Times website](#).
