

## All Recharged - Momentum, Partnerships, and Funding

**Summer is always a season of anticipation and excitement. We make plans to see new places, spend time with family, reconnect with old friends, meet new ones, or simply enjoy the weather and being outdoors. Most of all, it is a time to recharge and let go of routines that rule our daily lives for the rest of the year. But the beauty of life is that not everything turns out according to plan - and sometimes life surprises us by a better-than-expected outcome!**

### **Momentum - Strong Going Into The Summer, Growing Even Stronger During**

Before the summer, we launched a new version of our development platform with significantly better performance, supporting even more use cases driven by our customers' requirements. We were also pleased to announce that our large Asian customer was the first to take a license, which we successfully delivered and installed just days after the order.

We also welcomed our new VP of Business Development and Sales, Adam Andersson. Adam brings a strong background in sales, telecom and semiconductors, and he has spent more than 15 years working in Northeast Asia. With Japan as our hottest market right now, having someone with long-standing relationships across the Japanese ecosystem - including operators and device vendors - is a major advantage. A strong bonus is that he speaks Japanese. After two weeks of introductions, Adam set off to spend the summer in Japan and Taiwan, following up on the strong interest generated at Wireless Japan 2025, together with our representatives in Taiwan and Japan.

### **Partnerships - Nitto Denko Marks Another Milestone**

We are selling a concept made up of discrete products. With any concept, new requirements arise, and having partners with complementary offerings strengthen our value proposition and make the customer's transition easier. These complementary offerings help us to build even more sales momentum.

We have been working with Nitto for several years and have mutual trust and a deep understanding of each other's capabilities. As with some of our customers, we collaborate at trade shows and make joint customer and operator calls.

### **Funding - An Aggressive Move To Speed Up Industrialization**

In recent quarters, we have repeatedly - and with growing emphasis - stated that customer demand is building and that we need to secure high-volume qualified silicon as quickly as possible. To meet this demand and to accelerate industrialization, on August 4 the board of BeammWave decided to do a share issue of SEK 65M. This will enable us to hire more experts and enter this new phase stronger than ever.

The share issue means that if you were a shareholder on the record date, August 11, you will have received subscription rights visible in the same account as your BeammWave B shares. **PLEASE NOTE THAT YOUR BANK MAY HAVE A SIGNIFICANTLY EARLIER DEADLINE FOR SUBSCRIPTION THAN THE ONE COMMUNICATED BY BEAMMWAVE. THIS VARIES FROM BANK TO BANK, SO MAKE SURE YOU ARE IN CONTROL OF HOW YOUR SUBSCRIPTION RIGHTS ARE USED BY LOGGING INTO YOUR ACCOUNT AND CHECKING YOUR BANK'S PROCEDURES.**

### **A Fresh Digital Presence - Launching A Brand-New Website**

Today also marks the launch of our brand-new website - designed to reflect that we are moving on from being conceptually focused on our development platform (ADP1) towards placing volume and products at the center of our communication. Please visit [beammwave.com](https://beammwave.com) and let us know what you think.

Thanks for your strong support and engagement, I truly appreciate the communication with all of you - whether you are a customer, partner, supporter, or a shareholder. Your support makes all the difference as we continue to live by our “a little bit better every day” philosophy.

With warm and sunny regards,  
Stefan  
CEO, BeammWave AB
