

Tamtron secures the largest order in its history – Investment willingness strengthens positive economic signals

Tamtron Group Plc | Press Release | February 20, 2025 at 09:00:00 EET

Tamtron Precision Oy, a subsidiary of Tamtron Group Oyj, has received the largest order in the history of Tamtron Group from a major European technology supplier. The order encompasses the delivery of weighing and dosing equipment designed for the metal and mining industries, with a total value exceeding three million euros. The name of the customer has not been disclosed.

"Tamtron Precision has supplied weighing and dosing systems to various industries for decades. This order is a testament to our long-term customer's trust in our expertise and ability to deliver complex systems tailored for demanding industries," says Niko Toimela, VP of Sales and Marketing at Tamtron Precision.

The deliveries will take place primarily during 2025.

This order supports Tamtron's growth strategy and international expansion

Economic uncertainty has impacted several industries over the past year. However, investments in new technology within heavy industry indicate a budding confidence in growth.

"Industrial companies are increasingly investing in production efficiency and technological solutions that enhance process performance and optimise resource utilisation. This deal is a positive signal of this development. At the same time, it strongly supports Tamtron's growth strategy and strengthens our position in international markets," says Sami Pekkola, CEO of Tamtron Precision.

Tamtron is one of the world's leading providers of weighing solutions, offering a comprehensive range of precise and reliable weighing and dosing technologies across various industries. In line with its strategy, Tamtron continues to expand internationally and invests in innovative solutions that support sustainable industrial growth.
