

LIFECARE Q3 2023 REPORT AND WEBCAST

Lifecare AS will present Q3 2023 financial and operational status in a webcast Tuesday 14 November. The webcast will be for all shareholders and interested parties at 10:30 – 11:15 CET.

Lifecare's CEO Joacim Holter presents the company's Q3 report followed by a Q&A session where Joacim Holter will answer questions submitted in advance. Questions in connection with the Q3 report can be sent to the e-mail addresses listed below. Unfortunately, we have to take the liberty of moderating the number of questions due to time constraints.

Hegnar Media will host the webcast and will be available here: https://channel.royalcast.com/landingpage/hegnarmedia/20231114_6/

About us

Lifecare AS is a clinical stage medical sensor company developing technology for sensing and monitoring of various body analytes. Lifecare's main focus is to bring the next generation of Continuous Glucose Monitoring ("CGM") systems to market. Lifecare enables osmotic pressure as sensing principle, combined with the ability to manipulate Nano-granular Tunnelling Resistive sensors ("NTR") on the sensor body for read-out of pressure variations. Lifecare's sensor technology is referred to as "Sencell" and is suitable for identifying and monitoring the occurrence of a wide range of analytes and molecules in the human body.
