Comments by the CEO

For the first time, Alimak Group reported an adjusted EBITA margin of 17% (16.5). This is a team effort and another significant step towards reaching our financial target of an adjusted EBITA margin of 18%.

We continue to execute on our profitable growth strategy in a market environment that remains challenging. The market for high buildings in the US is very slow as a result of the market uncertainty caused by high interest rates and the upcoming US election. The construction market also remains challenging globally, but we see significant business opportunities beyond the current market headwind. We as a Group report order intake och revenue in line with last year and increase our profits. This confirms that our New Heights strategy continues to serve us well.

Our strong customer focus and investment in sales resources continue to drive growth. The Industrial division is a good example as the expansion of our sales organisation in France, Poland and Latin America is generating positive effect in the quarter. Further to this, our key account approach in the port segment has resulted in strong growth for ship-to-shore crane lifts, both new and refurbished.

Another important part of our strategy is to invest in technology leadership, where we focus on increasing our customer's productivity, reducing their total cost of ownership and making our products the safest and most environmentally friendly solutions in the industry. By integrating digital services with our physical products and focusing on user behaviour and training, we can further enhance the services surrounding our products, making their use even safer. This is a key focus area for all divisions, where we see increased interest from our customers and where we are currently accelerating our investments.

An important driver for the margin uplift in the quarter was the continued profitability improvement in the Facade Access division, reaching an EBITA margin of 10%. It is very pleasing to see the positive effects of our transformation program, which includes better project pricing and significant improvements in project execution. Driving operational efficiencies to become more flexible and agile in our cost base and reduce our capital employed is a key focus for the Group. The ongoing closure of the

Mammendorf assembly facility will reduce the cost base at the backend of this year and is moving according to plan.

Another key focus for the Group is cash flow, where we did not deliver to our own expectations in the quarter. We will increase our efforts to ensure that we reach our targeted level.

Focus going forward

Although some of our markets continue to be challenging, the high inflation finally starts to come down globally. As lower interest rates materialize, we expect the investment sentiment to gradually become more positive which would be beneficial to the Facade Access and Construction divisions. We are confident that we are well-positioned to capitalize on the positive effects that will follow.

We are on track to deliver on our financial and sustainability targets. With our deleveraging since the acquisition of Tractel, we also have a strong financial position to further invest in our profitable growth agenda.

I want to extend my gratitude to all our employees that with dedication and commitment every day drive our strategy and move the Group forward to New Heights. To all our employees, partners and customers – I wish you a great summer and look forward to the second half of 2024!

Ole Kristian Jødahl, President and CEO

Order intake decreased by 16% to MSEK 364 (433). We continue to see weak order intake for high complexity building maintenance units (BMUs) in North America. This is a consequence of the remaining high interest rates and the upcoming US election. We are retaining our BMU market share and are positive that the market will rebound, whilst we increase our focus on the infrastructure market.

Equipment order intake was higher than Q2 last year in APAC. Service order intake was higher in all regions.

Revenue was MSEK 496 (495). Service revenue continued to increase in all regions.

EBITA increased to MSEK 50 (26), corresponding to an EBITA margin of 10.0% (5.3). New equipment projects are signed at healthy margin levels and with contingencies. The service segment, together with refurbishment, retrofit and replacement segment, contributed positively to the margin improvement. The ongoing closure of the Mammendorf assembly facility is moving according to plan.

Notes

NOTE 1. ACCOUNTING POLICIES

This interim report was prepared in accordance with IAS 34, Interim financial reporting. The same accounting and valuation policies were applied as in the most recent annual report except for new and revised standards and interpretations effective from January 1, 2024. Non-IFRS measures are also presented in the report since they are considered to be important supplemental measures of the Alimak Group's performance. The definition of these can be found on page 25 of this report and a bridge from IFRS measures into non-IFRS measures is found on page 19 of this report.

Alimak Group AB is the Parent Company of Alimak Group. The Interim Report for the parent company has been prepared in accordance with the Annual Accounts Act and with the standard RFR 2 Reporting by a legal entity, issued by the Swedish Financial Reporting Board. The same accounting principles and methods of computation are followed in the interim financial statements as compared with the most recent annual report.

A detailed description of the Group's risks and uncertainties can be found in the Annual report. There are no significant changes in risks since the Annual Report for 2023 was published 19 March, 2024.

All items are stated in MSEK without decimals and, therefore, rounding differences can occur. Historic periods have been adjusted accordingly.

Level 1 - quoted prices in active markets for identical financial instruments

Level 2 - inputs other than quoted prices included in level 1 that are observable for the financial instrument, either directly (i.e., as prices) or indirect (i.e., derived from prices)

Level 3 – inputs for the financial instrument that are not based on observable market data (unobservable inputs)

Currency derivatives are valued at fair value by discounting the difference between the contracted forward rate and the rate that can be subscribed for on the balance sheet date for the remaining contract term.

The Other short term liability in 2024 (Other long-term liability in 2023) relates to the earn-out liability from the Tall Crane Equipment Ltd acquisition and is calculated in relation to the target fulfilment and is discounted to present value.

NOTE 5. ACQUISITIONS

No material acquisitions have been done during 2024.

NOTE 6. ASSETS PLEDGED AND CONTINGENT LIABILITIES

As of June 30, 2024, the maximum potential future payments Alimak Group could be required to make under issued financial guarantees totalled MSEK 700 (June 30, 2023, MSEK 885) of which MSEK 699 (June 30, 2023, MSEK 884) refers to indemnity bonds for commitments to customers. Assets pledged totalled MSEK 40 (June 30, 2023, MSEK 40).

DEFINITIONS

Alimak Group presents certain financial measures that are not defined in the interim report in accordance with IFRS. Alimak Group believes that these measures provide useful supplemental information to investors and the company's management when they allow evaluation of trends and the company's performance. As not all companies calculate the financial measures in the same way, these are not always comparable to measures used by other companies. These financial measures should not be seen as a substitute for measures defined under IFRS.

Rolling 12-month (R12M)

Numbers for the last 12 months measured backwards from the reporting period.

Average number of shares

Weighted average number of shares outstanding during the period, plus potential additional shares.

Earnings per share

Earnings after tax in relation to the average number of shares basic and diluted in accordance with IAS33.

EBITA

Operating profit before amortisation of intangible assets.

EBITA adj

Operating profit before amortisation of intangible assets. Items affecting comparability are added back.

EBITA adj %

EBITA adj in relation to net revenue.

EBITDA

Operating profit before depreciation and amortisation of property, plant and equipment and intangible assets.

Equity/assets ratio

Shareholders' equity as a percentage of total assets.

Equity per share

Shareholders' equity in relation to the number of basic shares outstanding at the end of the period.

Net debt

Interest bearing liabilities minus cash and cash equivalents.

Interest coverage ratio

EBIT in relation to interest expenses.

Items affecting comparability (IAC)

Items that are of non-recurring character such as acquisition related costs, restructuring costs and other items that have a major impact on the financial statements and are of significance to an understanding of the trend of income. Adjusting for items affecting comparability between periods provides a better understanding of the company's underlying operating activities.

Net Profit adj

Net profit excluding items affecting comparability and acquisition related amortization, net of tax.

Earnings per share adj

Net profit excluding items affecting comparability and acquisition related amortization, net of tax, in relation to the average number of shares before dilution in accordance with IAS33.

Operating profit (EBIT), as a percentage of revenue during the period.

Operating profit (EBIT)

Profit before financial items and tax.

Order intake

All orders where contracts have been signed and confirmed during the accounting period under review. Order intake generally cannot be used to accurately predict future revenues or operating performance. Orders can be cancelled, delayed or modified by the customer. Cancelled orders affect the reported order intake if cancellation takes place during the year the order was booked.

Return on capital employed

Operating profit (EBIT), rolling 12-month amount, as a percentage of average capital employed. Capital employed is the sum of net debt plus shareholders' equity plus shareholder loans. Average capital employed is calculated as the average of the balances at April 1, June 30, September 30, December 31 and March 31.

Return on equity

Profit after tax for the period, rolling 12-month amount, as a percentage of the average shareholders' equity excluding shares without a controlling interest.
