

Obducat receives order for wet processing system from a US based customer

OBDUCAT has received an order from a US based customer for the supply of a wet processing system based on the Company's QSW platform. The order value amounts to SEK 3.4 million and delivery is planned for the first quarter of 2027.

The order concerns a wet processing solution configured to perform various wet chemical processes, including photomask cleaning. The customer is a leading player within the photonics industry and the equipment will be installed at one of the customer's European manufacturing facilities.

Photomask cleaning is a critical process step in the manufacture of advanced photonics components. The solution provides the process capability, repeatability and control required for these demanding manufacturing environments.

About Obducat AB (publ)

Obducat AB (publ) is an innovative developer and supplier of technologies, products and processes used for the production and replication of advanced micro and nano structures. Obducat's products and services serve the demands of customers worldwide within the LED and Display, Optics and Photonics, MEMS and Sensor industries as well as in High Power and High Frequency electronics and Biomedical Devices. Obducat's technologies include nano imprint technology, resist- and wet processing technologies. Obducat has its own market presence in Sweden, Germany, Japan, USA, England, Portugal and China and the headquarter is located in Lund, Sweden. Obducat is a public company. The Obducat share is traded on the Swedish NGM Main Regulated Equity exchange. Read more at www.obducat.com or contact us via email investorrelations@obducat.com
