

REC Silicon – Presentation on NREL 31st Workshop on Crystalline Silicon Solar Cells & Modules

REC Silicon is invited to attend the National Renewable Energy Laboratory's (NREL) 31st Workshop on Crystalline Silicon Solar Cells & Modules - Materials and Processes, on July 28th-July 31st.

On Monday July 29th, at 11:10 a.m. MDT, Silicon Gases Global Sales Director for REC Silicon, Wayne Osborne, gave a presentation of the company. See attached for the entire presentation.

NREL is a federally funded research and development center sponsored by the US Department of Energy. The center specializes in research and development of renewable energy, energy efficiency, energy systems integration, and sustainable transportation. The Silicon Workshop promotes exchange of technical and scientific information between international researchers in the photovoltaic (PV) and relevant non-PV fields.

About Us

REC Silicon is a global leader in silane based high purity silicon materials. We combine 40 years experience and best-in-class proprietary technology to deliver on customer expectations. Our two U.S. based plants have a combined production capacity of more than 30,000 MT of high purity silane gas. Our Signature Silane® based products are used in everyday quality of life technologies, emerging technologies, cutting edge power and memory devices, high-voltage transmission, as well as renewables. REC Silicon is headquartered in Lysaker, Norway and listed on the Oslo stock exchange under the ticker: RECSI.
