

New distribution agreement for Malaysia

ZymIQ Technology AB has signed an exclusive distribution agreement for its oral care products, DentaPrev™ Dental Spray and DentaPrev™ Clean Teeth Enzyme Tab, with the Malaysian company Pahang Pharmacy Sdn Bhd.

Both products are part of the oral care series designed to clean the mouth and reduce plaque. DentaPrev™ Dental Spray is a mouth spray containing gentle enzyme-based ingredients. It supports a healthy oral microbiome while helping to reduce plaque.

DentaPrev™ Clean Teeth Enzyme Tab is an enzyme tablet that dissolves in the mouth and is developed to reduce plaque and biofilm formation. Both products can today be seen as a complement to regular tooth brushing.

Since its founding in 1971, Pahang Pharmacy Sdn Bhd has become a leading distributor of pharmaceutical and healthcare products. Its customers include more than 2,500 pharmacies and 5,000 clinics and hospitals across the country.

“With this agreement, we now have distribution agreements for our oral care products in both Thailand and Malaysia. We have also previously signed agreements for our animal care products in these two countries. This will allow us to establish a stronger presence and achieve volumes in a way we haven’t before,” concludes Michael Edelborg Christensen, CEO of ZymIQ.
