

Mycronic receives order for three mask writers

Mycronic AB (publ) has received an order for three mask writers from an existing customer in Asia: one Prexision 8 Evo, one Prexision Lite 8 Evo and one SLX. The order value is in the range of USD 40-45 million. Delivery of the Prexision 8 Evo is planned during the first quarter of 2026, Prexision Lite 8 Evo during the fourth quarter of 2025 and SLX during the third quarter of 2025.

The Prexision 8 Evo mask writer meets the market's requirements regarding complex patterns for display photomasks. Prexision Lite 8 Evo is designed to meet the requirements for cost-efficient production of photomasks for displays up to G8 mask size. The SLX laser mask writer meets rising demand for photomasks for the semiconductor industry and a future need for replacement and modernization.

"It is gratifying to receive this multiple order for mask writers that will produce photomasks for the display industry as well as the semiconductor industry. Operating and collaborating in both these industries creates great added value for both Mycronic and our customers", says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers and metrology systems for display manufacturing and production of semiconductors.
