BLINCVISION MOVES FORWARD WITH DEFENCE PARTNER FOLLOWING POSITIVE EVALUATION

BlincVision has completed an evaluation with a partner in the defence sector. The outcome was positive, and the parties are now discussing the next steps, with a focus on further testing in more realistic environments.

The purpose of the evaluation was to better understand how BlincVision's technology can meet specific needs in the defence sector. The next phase will provide an opportunity to test the technology in a specific application and under conditions closer to its intended use.

"The evaluation has given us valuable insights into the needs of the defence sector and how our technology can contribute in a specific application. The next step gives us the opportunity to continue developing the solution based on the specific needs and requirements of the application," says Markus Johansson, CEO of BlincVision.

About BlincVision AB (publ)

The company develops the groundbreaking sensor solution BlincVision. The solution enables vehicles and machines to react earlier in high-risk situations. The technology focuses on relevant changes in the field of view, allowing faster detection. The ambition is to contribute to increased safety in environments where rapid decisions are critical, from urban traffic to applications within autonomous mobility, defense, industry, and agriculture.

BlincVision is headquartered in Lund, Sweden, and also operates in Gothenburg.

The company is listed on Nasdaq First North Premier Growth Market.
