

QleanAir announces another important order from the school sector in Germany

QleanAir Holding AB (publ), the premium provider of solutions for clean indoor air, announces another important order from the school sector in Germany. This is the second major order for HEPA 14 air cleaning units from the same school district, worth approximately 490 TEUR.

The new order consists of a two-year rental contract worth 490 TEUR for FS 30 HEPA and FS 70 HEPA air cleaners that will be delivered during the first quarter in 2021. The first order from the school district in the Rhein-Main-area worth 500 TEUR was announced on December 10th. The two orders are the largest in the history of QleanAir within the Facility Solutions segment.

- The corona pandemic has raised the awareness of the importance of indoor air quality in Germany, and it has highlighted a need to improve the air quality in many schools. At QleanAir in Germany we are honored to contribute to a healthy and safe indoor environment in the schools, says Tobias Willi, Managing Director of QleanAir GmbH.

The local government in five German regions are funding investments in air quality in schools, as a complement to substandard ventilation. Air cleaning with HEPA 14 filters reduces the concentration of virus, bacteria, and other pollutants in the air, and is recommended by for Technische Universität in Berlin and the German ECDC.

- At QleanAir we are proud to provide a safer environment for organizations impacted by the pandemic, such as schools, says Christina Lindstedt, Chief Executive Officer, QleanAir.

Both FS 70 HEPA and FS 30 HEPA were launched during 2020, and are designed to reduce the levels of virus, bacteria, and other hazardous particles in the air. The units are designed for environments with high demands on efficient air cleaning and low sound levels, such as care facilities, schools, workplaces, and public spaces.
