

Elliptic Labs' Announced AI Virtual Human Presence Sensor™ on ThinkPad™ T Series Laptops

Oslo, Norway — [Elliptic Labs](#) (OSE: [ELABS](#)), a global AI software company and the world leader in AI Virtual Smart Sensors™ currently deployed in over 500 million devices, has launched its 100% software-only AI Virtual Human Presence Sensor on multiple [Lenovo](#) ThinkPad T Series laptops. This release covers the Lenovo ThinkPad T14 i Gen 5, T14s Gen 5, and T16 Gen 3. These laptops will be powered with the latest Intel and AMD chipsets (both [Intel](#) and [AMD](#) are Elliptic Labs' partners), except for the ThinkPad T16 Gen 3 laptop, which will run Intel only. The contract for this launch was [previously announced by Elliptic Labs](#).

Elliptic Labs' AI Virtual Smart Sensor Platform™ leverages the company's expertise in ultrasound, AI, and sensor fusion to deliver software-only AI Virtual Smart Sensors that bring seamless user experiences at scale for the PC, smartphone, IoT, and automotive industries. The AI Virtual Human Presence Sensors' delivers innovation, power, and value to the ThinkPad T Series, driving down power consumption while offering more user privacy and improved security. This announcement demonstrates how the AI Virtual Smart Sensor Platform is truly enhancing the user experience for Lenovo laptop users.

"The continuation and expansion of our relationship with Lenovo, the largest PC OEM in the world, has been an exciting development for Elliptic Labs," said Laila Danielsen, CEO of Elliptic Labs. "Launching our 100% software-based AI Virtual Human Presence Sensors at Mobile World Congress Barcelona 2024 broadly across many of Lenovo's most successful laptop models validates the scalability, power, and value of our AI Virtual Smart Sensor Platform. The work we are doing with world class enterprises like Lenovo opens up a broader opportunity for Elliptic Labs to deliver industry defining innovation that will empower all devices to become smarter, more user-friendly, and environmentally sustainable."

Elliptic Labs' AI Virtual Human Presence Sensor

Elliptic Labs' AI Virtual Human Presence Sensor detects when a user is present in front of a PC/laptop system. This allows the device to sleep when a user is absent, conserving battery life and electricity and safeguarding it from unpermitted access. Human presence detection is becoming a core capability in the PC/laptop industry, but it is currently featured only in high-end devices due to the cost, risk, and design limitations associated with a dedicated hardware presence sensor. Elliptic Labs' software-only AI Virtual Human Presence Sensor delivers robust human-presence detection that allows OEMs to easily and affordably incorporate human presence detection across a wide range of devices.

About Elliptic Labs

Elliptic Labs is a global enterprise targeting the smartphone, laptop, IoT, and automotive markets. Founded in 2006 as a research spin-off from Norway's Oslo University, the company's patented software uses AI, ultrasound, and sensor-fusion to create AI Virtual Smart Sensors that deliver intuitive 3D gesture-, proximity-, presence-, breathing-, and heartbeat -detection experiences. Its scalable AI Virtual Smart Sensor Platform™ creates software-only sensors that are sustainable, human-friendly, and already deployed in hundreds of millions of devices around the world. Elliptic Labs is the only software company that has delivered detection capabilities using AI software, ultrasound, and sensor-fusion deployed at scale. The company is listed on the Oslo Børs.

Elliptic Labs is headquartered in Norway with presence in the USA, China, South -Korea, Taiwan, and Japan. Its technology and IP are developed in Norway and are solely owned by the company.

Trademark

INNER BEAUTY is a registered trademark of Elliptic Labs.

AI Virtual Smart Sensor, AI Virtual Smart Sensor Platform, AI Virtual Proximity Sensor, AI Virtual Presence Sensor, AI Virtual Connection Sensor, AI Virtual Gesture Sensor, AI Virtual Heartbeat Sensor, and AI Virtual Breathing Sensor are trademarks of Elliptic Labs.

All other trademarks or service markets are the responsibility of their respective organizations.
