IDEX Biometrics secures multiple new access card orders from AuthenTrend

Oslo, Norway, and Taipei, Taiwan – 23 December 2025 – IDEX Biometrics ASA (OSE: IDEX) has secured multiple new access card orders from AuthenTrend, the largest volume orders to date, reflecting the accelerating enterprise demand for biometric smart cards as organizations combat escalating AI-powered credential theft.

The orders validate growing enterprise adoption of IDEX's industry-leading biometric access control technology. AuthenTrend, a leading Asia-Pacific security solutions provider, deploys IDEX biometric cards to large enterprises replacing vulnerable password and SMS-based authentication with offline biometric vaults that eliminate centralized attack surfaces.

"IDEX delivers the gold standard for secure authentication: your credentials are stored offline, in your own vault, accessible only through your biometric signature. The irony is perfect – to be secure online, you need to go offline. This is absolutely crucial in order to protect organizations from AI-powered attacks that can probe millions of accounts simultaneously. And because your credentials never enter a network, you are compliant by design – meeting GDPR, PCI-DSS, and data sovereignty requirements without the complexity," said Anders Storbråten, CEO of IDEX Biometrics.

About AuthenTrend

AuthenTrend was founded in 2016 (Taiwan) by a group of engineers with extensive experience in biometric authentication technology. Pioneer of fingerprint security keys, trusted by Microsoft Intelligent Security Association (MISA), FIDO and RSA, and awarded TOP 10 MFA Company in 2020 and TOP Biometric Solution Provider in 2021 by APAC Enterprise Security Magazine, a Taiwanese company awarded the US CES 2020 Innovation award (Security & Privacy).
