

Maven Wireless receives a first inbuilding order from Poland

The local partner and integrator AKP Wireless will provide inbuilding coverage for the Polish National Museum supporting all Polish mobile operators. The order value is 2,4 MSEK.

The customer will use Maven Wireless high power digital DAS and the newest low power DAS product called Nimbus.

This Maven coverage system will support all existing bands and technologies in Poland together with support for narrowband IoT sensors. The system is ready to be upgraded with additional 5G bands.

“I am happy to win our first purchase order from a customer in Poland to provide inbuilding coverage for all the Polish mobile operators. This is yet another step on our expansion path to be the global leader for wireless inbuilding- and tunnel solutions.” says Fredrik Ekström CEO of Maven Wireless.
